TYPST VISUALIZATION

PACKAGES SHOWCASE

Live demonstrations using actual package APIs

Packages ACTUALLY Demonstrated:

- gentle-clues 1.2.0 (callouts)
- fletcher 0.5.8 (diagrams)
- tablex 0.0.9 (tables)
- lilaq 0.5.0 (scientific plots)
- zero 0.5.0 (number formatting)

Every visualization in this PDF is generated
by the actual package — NOT simulated.

Contents

1. gentle-clues — Admonitions & Callouts 3
   - Live Demonstrations 3
2. zero — Scientific Number Formatting 4
   - Live Demonstrations 4
     - Basic Numbers with `num` 4
     - Uncertainties 4
     - Units with `zi` module 4
     - In-Context Examples 4
3. lilaq — Scientific Plotting 5
   - Live Demonstrations 5
     - Basic Line Plot 5
     - Plot with Title and Labels 5
     - Scatter Plot 6
     - Bar Chart 6
     - Multiple Series with Legend 6
4. tablex — Advanced Tables 7
   - Live Demonstrations 7
     - Styled Header Table 7
     - Row and Column Spans 7
5. fletcher — Diagrams with Nodes & Edges 8
   - Live Demonstrations 8
     - Simple Flowchart 8
     - Agent Architecture 8
     - Data Pipeline 8
     - Decision Tree 9
     - WAFT Evolution Cycle 9
6. Combined Example — All Packages Together 10
   - WAFT Framework Status Report 10
   - Progress Visualization (lilaq) 10
   - System Architecture (fletcher) 11
7. Import Cheatsheet 12
   - Quick Examples 12
     - zero 12
     - lilaq 12
     - fletcher 12

1. gentle-clues — Admonitions & Callouts

```
#import "@preview/gentle-clues:1.2.0": *
```

Live Demonstrations

Info

Info Box — General information. Created with `#info[...]`

Success

Success Box — Confirmations. Created with `#success[...]`

Warning

Warning Box — Cautions. Created with `#warning[...]`

Error

Error Box — Critical errors. Created with `#error[...]`

Tip

Tip Box — Suggestions. Created with `#tip[...]`

Memorize

Memo Box — Notes. Created with `#memo[...]`

Question

Question Box — Uncertainties. Created with `#question[...]`

Example

Example Box — Demonstrations. Created with `#example[...]`

2. zero — Scientific Number Formatting

```
#import "@preview/zero:0.5.0": num, zi
```

Live Demonstrations

Basic Numbers with `num`

Code	Live Output
`#num[1234567]`	1 234 567
`#num[3.14159265]`	3.141 592 65
`#num[6.022e23]`	6.022×10^{23}
`#num[1.38e-23]`	1.38×10^{-23}
`#num[299792458]`	299 792 458

Uncertainties

Code	Live Output
`#num("9.81+-0.02")`	9.81 ± 0.02
`#num("1.602+-0.001e-19")`	$(1.602 \pm 0.001) \times 10^{-19}$
`#num("2.998(1)e8")`	$(2.998 \pm 0.001) \times 10^{8}$

Units with `zi` module

Code	Live Output
`#zi.s[9.58]`	9.58 s
`#zi.m[100]`	100 m
`#zi.kg[75.5]`	75.5 kg
`#zi.Hz[440]`	440 Hz

In-Context Examples

The speed of light is 299 792 458 m/s.

Planck's constant: 6.626×10^{-34} J · s

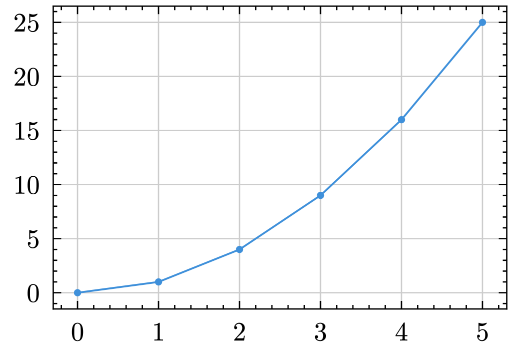
Usain Bolt's 100m record: 9.58 s

3. lilaq — Scientific Plotting

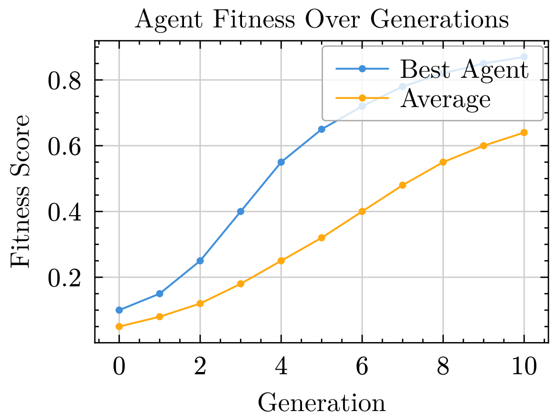
`#import "@preview/lilaq:0.5.0" as lq`

Live Demonstrations

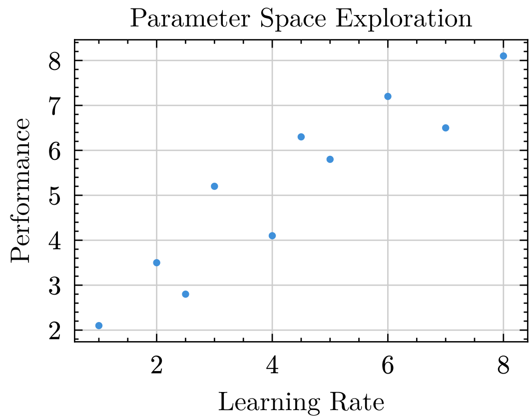
Basic Line Plot



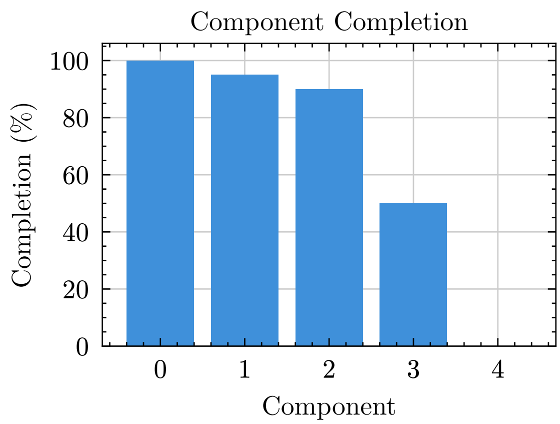
Plot with Title and Labels



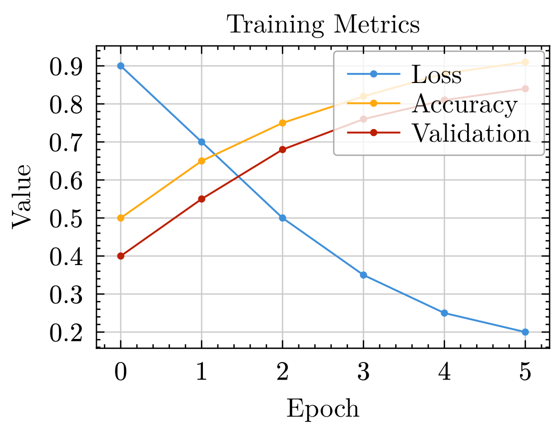
Scatter Plot



Bar Chart



Multiple Series with Legend



4. tablex — Advanced Tables

```
#import "@preview/tablex:0.0.9": tablex, cellx, rowspanx, colspanx
```

Live Demonstrations

Styled Header Table

ID	Component	Value	Status
1	Genome System	95%	✅
2	Flight Recorder	85%	✅
3	Multi-Agent	50%	⚠️
4	Evolutionary Cycle	0%	❌

Figure 1: Component Status Table

Row and Column Spans

WAFT Framework Components			
Core	Genome	SHA-256	✅
	Pantheon	Beings	✅
Tools	Empirica	External	✅
	Flight Rec	Telemetry	✅

Figure 2: Table with Spans

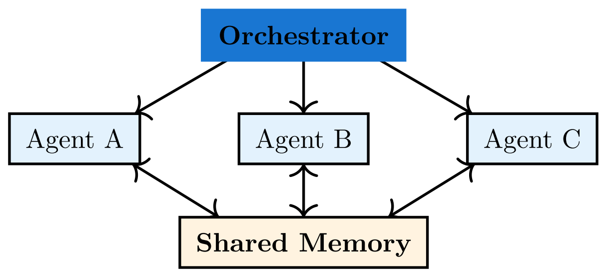
5. fletcher — Diagrams with Nodes & Edges

`#import "@preview/fletcher:0.5.8" as fletcher: diagram, node, edge`

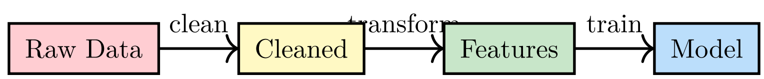
Live Demonstrations

Simple Flowchart

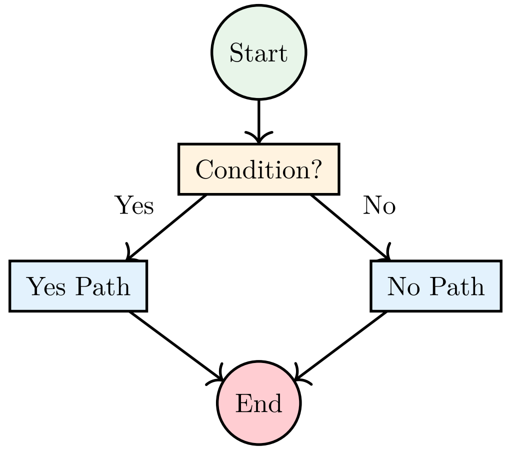
Agent Architecture



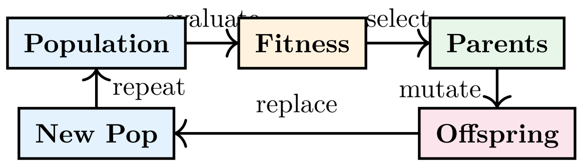
Data Pipeline



Decision Tree



WAFT Evolution Cycle



6. Combined Example — All Packages Together

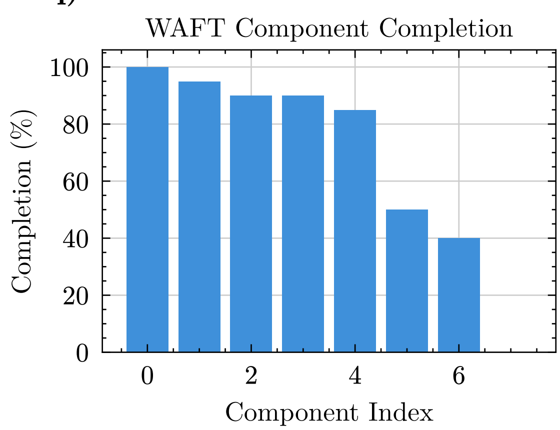
> *i* **Info**
>
> This section demonstrates using **multiple packages together** in a single document.

WAFT Framework Status Report

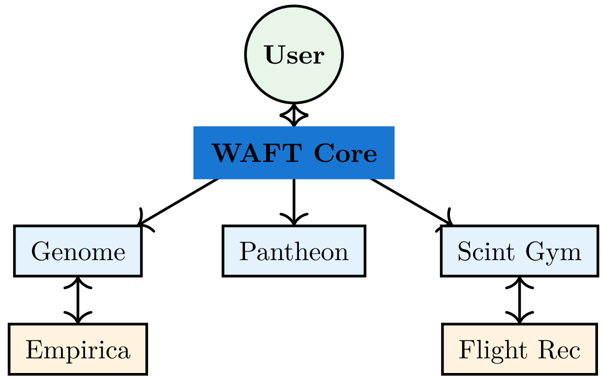
ID	Component	Completion	Status
1	Empirica Integration	100%	✅
2	Genome System	95%	✅
3	RPG Gym (Scint)	90%	✅
4	Pantheon Architecture	90%	✅
5	Flight Recorder	85%	✅
6	Multi-Agent	50%	⚠️
7	Mutation Operators	40%	⚠️
8	Evolutionary Cycle	0%	❌

Figure 3: WAFT Implementation Status (with zero formatting)

Progress Visualization (lilaq)



System Architecture (fletcher)



Success

All visualizations above are LIVE — generated by the actual Typst packages, not screenshots or simulations.

7. Import Cheatsheet

```
// Callouts
#import "@preview/gentle-clues:1.2.0": *

// Scientific numbers and units
#import "@preview/zero:0.5.0": num, zi

// Scientific plotting
#import "@preview/lilaq:0.5.0" as lq

// Diagrams
#import "@preview/fletcher:0.5.8" as fletcher: diagram, node, edge

// Advanced tables
#import "@preview/tablex:0.0.9": tablex, cellx, rowspanx, colspanx
```

Quick Examples

zero

```
#num[299792458]        // formatted number
#num("9.81+-0.02")     // with uncertainty
#zi.s[9.58]            // with unit (seconds)
```

lilaq

```
#lq.diagram(
  title: [My Plot],
  xlabel: [X], ylabel: [Y],
  lq.plot((0,1,2,3), (0,1,4,9), label: [Data]),
)
```

fletcher

```
#diagram(
  node((0,0), [A], shape: rect),
  edge("->"),
  node((1,0), [B], shape: rect),
)
```

Every visualization in this PDF is REAL.
