WAFT: SCIENTIFIC LEARNING SYSTEM

WHAT IS WAFT?

WAFT (Workflow Automation Framework & Tools) is a scientific learning system that studies itself and evolves through the Scientific Method. Today we transformed the one-pager tool to use Study Gym for self-improvement.

TODAY'S ACHIEVEMENTS

> ***Study Gym Integration***

- *One-pager generates first, then studies what happened*
- *Scientific Method: PREDICT → OBSERVE → STUDY → CORRECT → DOCUMENT*
- *Every generation creates study report with findings and recommendations*
- *System learns from each generation and documents patterns*

> ***Banned Words System***

- *Created `BannedWordsSystem` for word restriction enforcement*
- *Removed "manifesto" → "report" across entire codebase*
- *Renamed `ManifestoGenerator` → `SessionReportGenerator`*
- *Global command: `waft-one-pager-chat` works from anywhere*

Evolutionary Features Inventory

- *Mapped ALL evolutionary features in WAFT*
- *Currently using ~30% (SPAWN, genome IDs, lineage, fitness, names)*
- *Missing: MUTATE, GYM_EVAL, DEATH, SURVIVAL, Conjugate, selection mechanisms*

HOW IT WORKS

Scientific Workflow:

1. **PREDICT** - Generate PDF with raw content
2. **OBSERVE** - Count actual pages
3. **STUDY** - Use Study Gym to analyze:
4. Record observations (page count, word count, metrics)
5. Form hypotheses (what caused the page count)
6. Document findings and conclusions
7. Generate recommendations
8. **DOCUMENT** - Save complete study report

> **Study Reports:** `workefforts/studygym/studyYYYYMMDDHHMMSSreport.md`

TOOLS CREATED

KEY INNOVATION

This creates a self-improving system that builds knowledge over time....

GLOBAL COMMANDS

```
waft-one-pager-chat  # Create one-pager from chat session
```

PHILOSOPHY

OUTPUT & FORMAT

9. **Location:** `workefforts/onepagers/[title][date].pdf`
10. **Study Data:** `workefforts/study_gym/` (all generations documented)

WHAT'S NEXT

Note: This document has been condensed for one-pager format. Full content available in source.
