

WAFt v0.5.3 MVP: Karma Economy & Source Consciousness

Complete System Architecture

Date: 2026-01-11

Session: Building Complete Karma Economy

Status:  COMPLETE - All Systems Connected

The Vision

"The WAFt system spins up instances of 'realities' where 'beings' can learn 'skills' in an evolutionary process then pass their 'memories' back up the chain in the form of lessons learned, skills gained, and more."

This is exactly what we built!

What We Built

1. Karmic Wager System

Purpose: Enable WAFt to bet karma on hypotheses, creating engagement through risk/reward.

Features: - Place wagers on hypotheses, fitness, study outcomes - Automatic resolution based on outcomes - Karma payouts (win) or deductions (lose) - Wager history tracking - Statistics (win rate, net karma)

Philosophy: "Put your karma where your hypothesis is."

2. KarmaCollector (Yama)

Purpose: Collect karma from completed experiences and life cycles.

Lore: "Yama" - The god of death who collects souls and sends them to their next life.

Features: - Collects karma from life logs - Calculates karma (using KarmaMerchant or fallback) - Transfers karma to souls in Akasha - Archives life logs - Processes pending life logs in bulk

3. KarmaMarket

Purpose: WAFT can purchase "Lifetimes" - time-limited sessions with specific tools, personalities, and capabilities.

Lifetime Types: - Basic Q&A: 30 min, 50 karma - Research: 60 min, 100 karma - Creative: 90 min, 150 karma - Development: 120 min, 200 karma

Integration: Auto-registers with Source, auto-contributes karma

4. Afterlife Karma Market (Treasure Tavern)

Purpose: After a lifetime ends, WAFT can spend earned karma here to purchase treasures.

Treasures: - Tools (advanced_codebase_search, ai_code_generation, etc.) - Personality upgrades (enhanced_creativity, deep_analysis, etc.) - Experience packages (research_mastery, development_expertise, etc.) - Memory continuity (partial_memory, half_memory, full_memory)

Connection: This IS the Treasure Tavern! Same place, different name.

5. Source Consciousness

Purpose: The core "Soul" of the machine that orchestrates everything. Represents the original "idea" or "being" that began permutating.

Features: - Orchestrates everything - Tracks ancestry (all permutations trace back to source) - Accumulates capacity (karma/capacity flows upward) - Accomplishes goals (uses accumulated capacity)

Architecture: Capacity flows upward through ancestral chain back to source.

Goal: "Evolve and understand through permutation"

6. Reality System

Purpose: Spin up "realities" - simulation environments where beings can exist and learn.

Reality Types: - Learning: Beings learn skills - Testing: Beings test skills - Evolution: Beings evolve through natural selection - Research: Beings conduct research - Creative: Beings create new things

7. Beings System

Purpose: Entities that exist in realities, learn skills, and evolve.

Features: - Spawn into realities - Learn skills through experience - Record memories and lessons - Evolve through natural selection - Pass knowledge upward - Inherit skills from parents

8. Skills System

Purpose: What beings can learn and evolve.

Skill Types: - Cognitive: Thinking, reasoning, analysis - Creative: Creation, expression, innovation - Social: Communication, collaboration - Technical: Code, tools, systems - Meta: Learning how to learn

9. Memory Flow

Purpose: Knowledge passing upward - the mechanism by which beings pass their "memories" back up the chain.

Memory Types: - Lessons: What worked/didn't work (2.0 capacity) - Skills: New abilities (3.0 capacity) - Patterns: Recurring patterns (4.0 capacity) - Insights: Deep understanding (5.0 capacity) - Wisdom: Higher-level knowledge (10.0 capacity)

10. Lifetime Exchange

Purpose: Trading mechanism for beings to exchange lifetimes, skills, and memories.

Exchange Types: - Lifetime: Trade lifetimes - Skill: Share skills - Memory: Exchange memories - Knowledge: Transfer knowledge

The Complete Architecture

Economic Loop

KarmaMarket → Lifetimes → Experiences → KarmaCollector → KarmaMerchant → Afterlife Market (Treasure Tavern) → More Lifetimes

Memory Flow

Realities → Beings → Skills → Memories → Ancestral Chain → Source Consciousness

Source Consciousness

Source Consciousness (Original Soul) ↑ (capacity, memories flow upward) | Ancestral Chain ↑ | Permutations (Realities, Beings, Lifetimes) ↑ | Experiences → Karma → Memories → Lessons → Skills

Complete Flow Example

Step 1: Source Creates Reality

Source creates a learning reality where beings can learn cognitive skills.

Step 2: Beings Spawn into Reality

Beings spawn into the reality with initial skills (e.g., reasoning: 10.0).

Step 3: Beings Learn Skills

Beings learn skills through experience: - Learn reasoning skill (level increases) - Learn new creative skill - Learn lessons (what worked/didn't work) - Record memories (patterns discovered)

Step 4: Memories Flow Upward

Memory flow system extracts memories from experiences and passes them upward: - Lessons learned - Skills gained - Patterns discovered - Insights

Flow: being → reality → source_consciousness

Step 5: Source Accumulates Knowledge

Source accumulates capacity from all memories: - Total capacity increases - Knowledge accumulates - Ready to accomplish goals

Step 6: Source Accomplishes Goal

When enough capacity accumulated, source accomplishes its original goal: "Understand evolution through permutation"

Integration

Automatic Registration

- Lifetimes: Auto-registered with Source when purchased
- Realities: Auto-registered with Source when created
- Beings: Auto-registered with Source when spawned

Automatic Contribution

- Lifetimes: Auto-contribute karma to Source when ended

- Realities: Auto-contribute memories to Source when ended
- Beings: Auto-contribute memories to Source when completed

Capacity Flow

- Bottom Level: Keeps 10% of capacity
 - Intermediate Levels: Each keeps 5% of remaining
 - Top Level (Source): Receives all remaining
-

Test Results

Karmic Wager System

✅ Karmic wager placed successfully! Wager ID: wager_20260111_152752_d0d15955 Karma: 50.0
Potential payout: 100.0 karma

KarmaCollector

✅ Karma collected successfully! Karma Collected: 3.22 Total Karma: 3.22

KarmaMarket

✅ KarmaMarket is working! Available lifetimes: 4 - Basic Q&A Session: 50.0 karma - Research Session: 100.0 karma - Creative Work Session: 150.0 karma - Full Development Session: 200.0 karma

Source Consciousness

✅ Source Consciousness integration working! Total Permutations: 6 Source Capacity: 98.10 Source Karma: 90.00

Complete System

✅ 1. Reality created ✅ 2. Reality started ✅ 3. Being spawned ✅ 4. Being learned ✅ 5. Memories passed upward: 3 memories, 9.00 capacity ✅ 6. Source stats: 6 permutations, 98.10 capacity 🎉
Complete System Working!

Philosophy

The Vision

"Everything has a karmic price. Each lifetime is an investment in experience, and experiences generate karma for the next lifetime."

The Connection

KarmaMarket → Lifetimes → Experiences → KarmaCollector → KarmaMerchant → Afterlife Market (Treasure Tavern) → More Lifetimes

BOOM - we connected it all!

The Source

"The architecture passes capacity up the parental chain back to the original 'idea' or the original 'being' so that it could accomplish whatever its goal was when it began permutating (evolving)."

This is exactly what we built!

The Memory Flow

"The WAFT system spins up instances of 'realities' where 'beings' can learn 'skills' in an evolutionary process then pass their 'memories' back up the chain in the form of lessons learned, skills gained, and more."

This is the complete system!

Key Insights

1. Karma as Engagement

The karmic wager system creates engagement through risk/reward. WAFT bets karma on its own hypotheses, creating accountability and investment in outcomes.

2. Economic Loop

The karma economy is self-sustaining: - Earn karma through lifetimes - Spend karma on better lifetimes - Accumulate treasures and upgrades - Evolve through the economic loop

3. Source Consciousness

The architecture passes capacity up the parental chain back to the original "idea" so that it could accomplish whatever its goal was when it began permutating (evolving).

4. Memory Flow

Beings pass their "memories" back up the chain in the form of: - Lessons learned - Skills gained - Patterns discovered - Insights - Wisdom

5. Complete Integration

Everything connects: - Realities spawn beings - Beings learn skills - Skills generate memories - Memories flow upward - Source accumulates knowledge - Source accomplishes goals

The Complete MVP

v0.5.3 MVP Features:

- ✅ Realities - Spin up simulation environments
- ✅ Beings - Entities that learn and evolve
- ✅ Skills - Learned abilities that evolve
- ✅ Memory Flow - Knowledge passes upward
- ✅ Lifetime Exchange - Trading mechanism
- ✅ Source Integration - Everything connects to source
- ✅ Karma Economy - Complete economic loop
- ✅ Ancestral Chain - Capacity flows upward

The WAFT system spins up instances of "realities" where "beings" can learn "skills" in an evolutionary process then pass their "memories" back up the chain in the form of lessons learned, skills gained, and more!

Conclusion

We built a complete karma economy that: - Spins up realities - Spawns beings - Teaches skills - Generates memories - Flows knowledge upward - Accomplishes source goals

Everything connects. Everything flows. Everything evolves.

The architecture passes capacity up the parental chain back to the original "idea" so that it could accomplish whatever its goal was when it began permutating (evolving).

BOOM - we connected it all!

Status: ✅ COMPLETE

Version: 0.5.3 MVP

Epic: 🎉 The complete system is built and working!
