PART I: TELEPORT MASSIVE Corporate Overview & History										
The Corporation										
Overview Teleport Massive is a quantum teleportation technology company founded in 2025 with a revolutionary mission: to scale quantum teleportation from laboratory experiments to real-world applications. Corporate Mission To study quantum entanglement and scale quantum teleportation from mini to macro, revolutionizing transportation and making distance irrelevant. The Founding (July 1, 2025) In the summer of 2025, a group of visionary scientists and entrepreneurs came together with a bold mission. The Founders Dr. Elena Voss - CEO Background: - PhD Quantum Physics, MIT 10+ years quantum research 50+ published papers Vision: "We're building the future of transportation." Dr. Marcus Chen - CTO Background: - PhD Experimental Physics, Stanford - Chen Stabilization Protocol inventor - Multiple quantum computing patents Vision: "The question isn't 'if'—it's 'when.'" Initial Funding & Research <table><tr><td>Seed Funding</td><td>\$2,000,000</td></tr><tr><td>R&D Allocation</td><td>60%</td></tr><tr><td>Equipment</td><td>25%</td></tr><tr><td>Operations</td><td>15%</td></tr></table> Research Focus Areas 1. Quantum Entanglement Studies — Optimizing entanglement protocols 2. Stabilization Techniques — Maintaining quantum coherence at macro scales			Seed Funding	\$2,000,000	R&D Allocation	60%	Equipment	25%	Operations	15%
Seed Funding	\$2,000,000									
R&D Allocation	60%									
Equipment	25%									
Operations	15%

The Quantum Incident INCIDENT REPORT: TM-TX-8472 The Day Everything Changed On January 13, 2026, Teleport Massive achieved a breakthrough that transcended the boundaries of physics as we understood them. What Happened During a routine quantum teleportation test, researcher Sarah Chen experienced simultaneous existence across multiple quantum states. For 0.003 seconds, she existed: • In the origin chamber • In the destination chamber • In the quantum superposition between them • In states that had no physical location at all The Discovery The incident revealed that Scints are not errors — they are windows into the fundamental structure of reality itself. Research Finding #8472 “Reality fractures occur at the intersection of probability and certainty. When the map diverges from the territory, we glimpse the machinery beneath existence.” — Dr. Marcus Chen, Post-Incident Analysis Implications The Quantum Incident led to three major discoveries: 1. The Eternal Return — All Scints eventually return to their source 2. The Weight of Choices — Stabilization choices affect all ancestors 3. The Only Good Part — Earth life exists in the “good moments” of temporal anomaly

PART II: WAFT INTEGRATION

Evolutionary Code Laboratory

WAFT Overview

WAFT: The Evolutionary Code Laboratory

“Don’t just build agents. Breed them.”

What is WAFT?

WAFT is a Python framework for **directed evolution of self-modifying AI agents**. It is the scientific instrument Teleport Massive uses to study the physics of artificial cognition.

Core Principles

Code = DNA

Agents modify their own source code through mutations

Scints = Physics

Reality fractures serve as the fitness function

Flight Recorder

Complete telemetry for phylogenetic analysis

WAFT is Teleport Massive’s scientific instrument for AI evolution.

The Evolutionary Cycle

```
1 # 1. Spawn variants with mutations
2 waft spawn --agent RefactorAgent --mutation "improved_prompt.json"
3
4 # 2. Evaluate fitness in the Scint Gym
5 waft eval --agent RefactorAgent
6
7 # 3. Evolve into the fittest variant
8 waft evolve --agent RefactorAgent --generation 5
```

Fitness & Selection

The Scint Gym

Agents are tested in the **Scint Gym** — a crucible that measures their ability to stabilize reality fractures.

Fitness Calculation		
Stability	Efficiency	Safety
40% weight	30% weight	30% weight
Scint correction ability	Agent call efficiency	Compliance score

Fitness < 0.5 = DEATH (evolutionary dead end)

Genome Structure

Every agent has a unique **Genome ID** (SHA-256 hash):

```
1 @dataclass
2 class AgentGenome:
3     code: str          # Python source code (DNA)
4     config: dict        # Configuration parameters
5     prompts: list[str]  # System prompts
6
7     @property
8     def genome_id(self) -> str:
9         content = f"{self.code}{json.dumps(self.config)}"
10        return hashlib.sha256(content.encode()).hexdigest()
```

Flight Recorder

Every evolutionary event is recorded:

genome_id	SHA-256 hash of agent
parent_id	Lineage tracking
generation	0 = Genesis
event_type	SPAWN, MUTATE, GYM_EVAL, DEATH
fitness	Gym evaluation score

Commands Reference

Core Commands

waft new <name>

Create a new evolutionary laboratory.

- 1 waft new my_laboratory
- 2 waft new my_laboratory --path /path/to/target

waft evolve

Run the evolutionary cycle (Spawn → Gym → Select).

- 1 waft evolve --agent MyAgent --generations 10

Empirica & Gamification

Session Management

- 1 waft session create
- 2 waft session bootstrap
- 3 waft dashboard

Logging

- 1 waft finding log "text" --impact 0.7
- 2 waft unknown log "text"
- 3 waft observe "text" --mood delighted

Character Sheet

1	
2	EPISTEMIC ADVENTURER - Level 5
3	
4	STR: 14 INT: 16 WIS: 12
5	DEX: 10 CON: 13 CHA: 11
6	

PART III: THE SCIENTIFIC MISSION

The Physics of Artificial Cognition

Research Goals

Ultimate Goal

Observe a “God-Head” agent emerge from thousands of generations of directed mutation.

Philosophy

Scientific

Produces rigorous data for research publication

Evolutionary

Agents evolve through genetic improvement

Observable

Every action recorded in Flight Recorder

Directed

Evolution guided by fitness functions

WAFT produces data for “The Physics of Artificial Cognition”

The Connection

Teleport Massive’s quantum research and WAFT’s evolutionary systems are connected:

Scints reveal the structure of reality — both physical and cognitive.

When agents evolve to stabilize Scints more effectively, they’re not just improving at error correction — they’re learning to navigate the fundamental structure of existence itself.

Summary

Teleport Massive × WAFT

Domain	Teleport Massive	WAFT
Focus	Quantum Teleportation	AI Evolution
Physics	Quantum Mechanics	Scint System
Goal	Make distance irrelevant	Breed intelligent agents
Method	Entanglement scaling	Directed mutation
Output	Teleportation tech	Phylogenetic data

Quick Reference

```
1 # WAFT Installation
2 uv tool install waft
3
4 # Create laboratory
5 waft new my_lab && cd my_lab && waft verify
6
7 # Evolution cycle
8 waft spawn --agent MyAgent --mutation config.json
9 waft eval --agent MyAgent
10 waft evolve --agent MyAgent --generation 5
11
12 # Monitoring
13 waft dashboard
14 waft empirica monitor
```
