

WAF^T Worldbuilding & AI Framework for Teleport

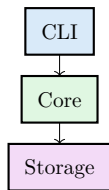

"Don't just build agents. Breed them."

What is WAF^T?

A Python framework for:

- **Evolutionary AI** — Breed agents
- **Worldbuilding** — Simulate realities
- **Documents** — Generate PDFs
- **Research** — Track knowledge

Core Architecture

Key Numbers

Python Modules	443+
Classes	285
Templates	80+
CLI Commands	20+

Storage

- **JSON** — Beings, Corporations
- **SQLite** — Flight Recorder
- **Files** — Checkpoints, Seeds

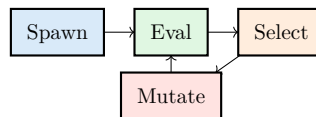

Beings System

Timeful agents with:

- Skills (0-10)
- Memories
- Personality
- Goals
- Fitness

States: SPAWNING → LEARNING → EVOLVING → COMPLETING

Evolution Engine

Scint Types

SYNTAX_TEAR	0.3
LOGIC_FRACTURE	0.5
HALLUCINATION	0.6
SAFETY_VOID	0.9

Corporation Sim

- Departments
- Employees (Beings)
- Financial tracking
- Time simulation

Templates

- Typst (50+) • HTML (20+)
- Reports • Briefs
- Memos • Invoices

Empirica

13 epistemic vectors:

- Foundation (4)
- Comprehension (4)
- Execution (4)
- Uncertainty (1)

Gamification

- XP & Levels
- Karma system
- Character stats
- Achievement tracking

Quick Start

```
uv tool install waft
waft new my_lab
waft evolve --gen 10
waft dashboard
```

Links

GitHub: github.com/ctavolazzi/waft

Evolve

Breed AI through selection + mutation

Simulate

Corporations, economies, realities

Document

PDFs, reports, briefs automatically

Research

Track knowledge with Empirica

Beings

Timeful agents

Corporations

Economic sim

Evolution

Agent breeding

Chronicler

Auto-docs

Flight Recorder

Telemetry
