

WAFt CLI REFERENCE

Evolutionary Code Laboratory | Quick Reference Card

Installation

```
1 uv tool install waft
```

Shell

Or from source:

```
1 git clone https://github.com/ctavolazzi/waft
2 cd waft && uv sync
```

Shell

Core Commands

waft new

Create a new evolutionary laboratory.

```
1 waft new my_lab
2 waft new my_lab --path /custom/path
```

Shell

waft verify

Verify laboratory structure and dependencies.

```
1 waft verify
2 waft verify --fix # Auto-fix issues
```

Shell

waft spawn

Create agent variants with mutations.

```
1 waft spawn --agent MyAgent
2 waft spawn --agent MyAgent \
3 --mutation config.json
```

Shell

waft eval

Evaluate agent in Scint Gym.

```
1 waft eval --agent MyAgent
2 waft eval --agent MyAgent --verbose
```

Shell

waft evolve

Run full evolutionary cycle.

```
1 waft evolve --agent MyAgent
2 waft evolve --agent MyAgent \
3 --generations 10
```

Shell

Session Management

waft session

```
1 waft session create
2 waft session bootstrap
```

Shell

```
3 waft session list
```

```
4 waft session close
```

waft dashboard

Launch monitoring dashboard.

```
1 waft dashboard
2 waft dashboard --port 8080
```

Shell

Empirica Integration

Logging Commands

```
1 waft finding log "Discovery" \
2 --impact 0.7
3
4 waft unknown log "Question"
5
6 waft observe "Note" \
7 --mood delighted
```

Shell

Assessment

```
1 waft preflight # Before work
2 waft postflight # After work
3 waft check # Mid-work gate
```

Shell

Gamification

Character Sheet

```
1 waft character # View stats
2 waft character --detailed
```

Shell

Karma & XP

```
1 waft karma # View karma
2 waft karma add 10 "Good deed"
3 waft xp # View XP
```

Shell

Agent Commands

List & Info

```
1 waft agents list
2 waft agents info MyAgent
3 waft agents history MyAgent
```

Genome Operations

```
1 waft genome show MyAgent
2 waft genome diff Agent1 Agent2
3 waft genome export MyAgent \
4 --output genome.json
```

Flight Recorder

Query Events

```
1 waft flight list
2 waft flight show <event_id>
3 waft flight query \
4 --type GYM_EVAL \
5 --since "1 hour ago"
```

Export

```
1 waft flight export \
2 --format json \
3 --output events.json
```

Scint Gym

Run Tests

```
1 waft gym run MyAgent
2 waft gym run MyAgent \
3 --scenario "complex_task"
```

View Results

```
1 waft gym results
2 waft gym results --agent MyAgent
```

Configuration

Config File

Located at ~/.waft/config.toml or ./waft.toml

```
1 [defaults]
2 model = "gpt-4"
3 max_retries = 3
4
5 [gym]
6 timeout = 300
7 parallel = 4
8
9 [evolution]
10 mutation_rate = 0.1
11 population_size = 10
```

Environment Variables

```
1 WAFT_HOME=/path/to/waft
2 WAFT_MODEL=gpt-4
3 WAFT_DEBUG=1
```

Useful Patterns

Full Evolution Cycle

```
1 waft new my_lab && cd my_lab
2 waft verify --fix
3 waft spawn --agent BaseAgent
4 waft evolve --generations 5
5 waft dashboard
```

Quick Debug

```
1 WAFT_DEBUG=1 waft eval \
2 --agent MyAgent --verbose
```
