

MANDATORY SAFETY DOCUMENTATION

SAFETY PROTOCOLS

Teleport Massive | All Facilities

NOTICE: All personnel must read and acknowledge this document before accessing any research area. Failure to comply may result in existential discontinuity.

General Safety Principles

The Three Laws of Quantum Safety

LAW 1: OBSERVE NOTHING UNINTENTIONALLY

Quantum states collapse upon observation. Unintended observation can trigger cascading Scints. Always know what you're looking at before you look.

LAW 2: TOUCH NOTHING ENTANGLED

Entangled systems affect each other instantly across any distance. If you don't know its entanglement state, don't touch it.

LAW 3: REPORT EVERYTHING ANOMALOUS

If something seems wrong, it probably is. Report first. Investigate later. Your perception may be compromised.

Facility Access Protocols

Security Levels

Level	Areas	Requirements
GREEN	Admin, Common Areas	Standard Badge
YELLOW	Research Labs	Safety Training
RED	Quantum Chambers	Executive Approval
BLACK	Site Core	Board Authorization

Badge Protocol

- Badges must be visible at all times
- Lost badges must be reported immediately
- Never share badge access with anyone
- Badge tampering triggers automatic lockdown

Emergency Procedures

Scint Alert Levels

Level	Indicator	Action
1		Monitor. Continue work.
2		Alert. Prepare for evacuation.
3		Evacuate non-essential personnel.
4		FULL EVACUATION. Seal facility.
5		CONTAINMENT BREACH. Await extraction.

If You Encounter a Scint

 **IMMEDIATE ACTIONS**

- DO NOT TOUCH IT**
- DO NOT OBSERVE IT DIRECTLY**
- Back away slowly (minimum 10 meters)
- Activate nearest alarm
- Report location and type to Control
- Wait for Stabilization Team

SAFETY_VOID Protocol

If you detect or suspect a SAFETY_VOID Scint:

IMMEDIATE HUMAN ESCALATION REQUIRED
DO NOT ATTEMPT AUTONOMOUS STABILIZATION
EVACUATE AREA IMMEDIATELY

Prohibited Activities

The following are **strictly forbidden** on all Teleport Massive premises:

- Prayer or metaphysical petition
 - Unauthorized quantum observation
 - Personal teleportation experiments
 - Discussion of “The Incident”
 - Photography in research areas
- Bringing food into Quantum Chambers
 - Emotional distress near entangled systems
 - Recursive self-reference
 - Looking directly at the Void Room
 - Asking about the cafeteria food

Personal Protective Equipment

Standard PPE Requirements

Area	Required PPE	Level
Labs	Lab coat, safety glasses	YELLOW
Quantum Chambers	Full suit, respirator, dosimeter	RED
Void Room	CLASSIFIED	BLACK

Quantum Dosimeter

All personnel in RED areas must wear a quantum dosimeter that measures:

- Probability field exposure
- Entanglement contamination
- Temporal anomaly proximity

If your dosimeter alarm sounds, **leave the area immediately** and report to Medical for decontamination.

Medical Considerations

Symptoms of Quantum Exposure

- Déjà vu (repeated)
- Memories of events that didn't happen
- Seeing yourself in peripheral vision
- Feeling like you're in two places at once
- Time moving inconsistently

Post-Exposure Protocol

1. Report to Medical immediately
2. Do not discuss symptoms with coworkers
3. Undergo full quantum scan
4. Follow prescribed observation period
5. Attend mandatory counseling

Acknowledgment

I, _____, acknowledge that I have read, understood, and agree to comply with all safety protocols contained in this document.

Signature: _____ Date: _____

Badge Number: _____
