

SITE-DELTA-9

Teleport Massive Research Installation

Facility Guide | Classification: Internal

Overview

Site-Delta-9 is Teleport Massive's primary research installation, located [REDACTED]. The facility houses the company's most advanced quantum teleportation equipment and serves as the center for Scint research.

NOTE: This document contains general facility information only. Detailed layouts, security protocols, and research specifics are available on a need-to-know basis.

Facility Levels

Level 1: Administration (GREEN Clearance)

- Main entrance and reception
- Human Resources offices
- General meeting rooms
- Visitor processing

Level 2: Research Labs (YELLOW Clearance)

- Standard research laboratories
- Equipment calibration rooms
- Data analysis centers
- Graduate student offices

Level 3: Advanced Labs (RED Clearance)

- Quantum entanglement chambers
- Teleportation testing facilities
- Scint detection equipment
- Post-incident analysis rooms

Level 4: Quantum Core (BLACK Clearance)

 RESTRICTED ACCESS

- Quantum Chamber 7 (site of The Incident)
- Primary teleportation apparatus
- Scint containment systems
- [ADDITIONAL INFORMATION REDACTED]

Level 5: The Void Room (SPECIAL Clearance)

INFORMATION CLASSIFIED

Contact Executive Council for access requirements

Key Locations

Quantum Chamber 7

Where the Quantum Incident occurred. Now serves as the primary Scint research facility. Enhanced monitoring and containment systems installed following TM-TX-8472.

The Cafeteria

Located on Level 1. Open 6 AM - 10 PM. Surprisingly good food. **Do not ask questions about the food.**

Medical Bay

Level 2. Staffed 24/7. Specialized in quantum exposure treatment and post-Scint psychological support.

The Archive

Level 3. Contains all research documentation, Flight Recorder backups, and historical records. Temperature and humidity controlled.

Daily Operations

Shift Schedule

Shift	Hours
Day	6:00 AM - 2:00 PM
Swing	2:00 PM - 10:00 PM
Night	10:00 PM - 6:00 AM

Regular Drills

- Scint Drill:** Monthly (first Monday)
- Evacuation Drill:** Quarterly
- Containment Drill:** Bi-annually
- Full Facility Lockdown:** Annual test

Emergency Procedures

Scint Alert

1. Alarm sounds (distinctive warbling tone)
2. Check nearest Scint indicator panel
3. Follow color-coded evacuation routes
4. Report to designated assembly area
5. Await all-clear announcement

Containment Breach

1. **DO NOT PANIC**
 2. Seal all doors (automatic in most areas)
 3. Don protective equipment if available
 4. Avoid looking at any anomalies
 5. Wait for extraction team

Amenities

- On-site gym (Level 1)
- Meditation room (Level 1)
- Library and reading room (Level 2)
- Rooftop garden (access restricted during experiments)
- Sleeping quarters for extended shifts (Level 2)
