

GLOSSARY

Teleport Massive × WAFT | Terms & Definitions

A

Agent — An autonomous entity in WAFT that can process inputs, make decisions, and evolve through mutation.

Ancestral State — Previous states in a probability chain that can be affected by current stabilization choices.

B

Being — An entity in WAFT's ontology system with identity, cognition, and agency.

Breeding — The process of combining genomes from two parent agents to create offspring.

C

CASCADE — The Empirica workflow: Preflight → Work → Check → Postflight.

Chen Stabilization Protocol — Dr. Marcus Chen's breakthrough technique for maintaining quantum coherence at macro scales.

Containment Breach — When a Scint or anomaly escapes controlled conditions.

D

D-I-I-V Protocol — Detect, Isolate, Inject, Verify — the Scint stabilization procedure.

DEATH Event — When an agent is removed from the population due to low fitness.

E

Emergence — When agents develop unexpected capabilities through evolution.

Empirica — Epistemic self-assessment system for tracking knowledge.

Epistemic Vector — One of 13 dimensions measuring knowledge state.

Eternal Return — The mechanism by which all probability states eventually collapse back to origin.

Evolution Engine — WAFT's core component managing populations and selection.

F

Fitness — A numerical score (0-1) measuring agent performance.

Flight Recorder — WAFT's telemetry system capturing all evolutionary events.

Founder — One of Teleport Massive's original founding team members.

G

Generation — One cycle of evaluation, selection, and breeding.

Genome — The complete genetic information of an agent (code + config + prompts).

Genome ID — SHA-256 hash uniquely identifying an agent's genome.

God-Head — Hypothetical emergent superintelligent agent.

GREEN Clearance — Basic facility access level.

H

HALLUCINATION — Scint type: fabricated facts or wrong citations.

I

Incident TM-TX-8472 — The Quantum Incident involving Sarah Chen.

L

Laboratory — A WAFT project directory containing agents and evolution data.

LHC Moment — September 10, 2008, 10:28 AM — theorized moment of reality creation.

Lineage — The ancestry chain of an agent back to its genesis.

LOGIC_FRACTURE — Scint type: paradoxes and contradictions.

M

Mutation — A change to an agent's genome.

Mutation Rate — Probability of mutation occurring during breeding.

O

Ontological Error — Another term for Scint; reality fracture.

P

Population — The set of agents in a generation.

Postflight — Empirica assessment after completing work.

Preflight — Empirica assessment before starting work.

Q

Quantum Chamber — Facility room for teleportation experiments.

Quantum Incident — See Incident TM-TX-8472.

R

Reality — A simulation context where Beings exist.

Reality Fracture — See Scint.

RED Clearance — High-security facility access level.

S

SAFETY_VOID — Scint type: harmful content generation (severity 0.9).

Scint — Semantic Contradiction/Inconsistency/Noise Token; a reality fracture.

Scint Gym — WAFT's fitness evaluation environment.

Selection — Choosing agents to survive and breed based on fitness.

Site-Delta-9 — Teleport Massive's primary research facility.

Spawn — Creating a new agent (generation 0).

Stabilization — Correcting a Scint to restore valid reality state.

SYNTAX_TEAR — Scint type: formatting and structure errors.

T

Teleport Massive — Quantum teleportation technology corporation.

Temporal Anomaly — Region of spacetime where consciousness is possible.

U

Uncertainty — Empirica meta-vector tracking explicit unknowns.

V

Void Room — Classified location at Site-Delta-9.

W

WAFT — Evolutionary code laboratory for breeding AI agents.

Weight of Choices — Concept that stabilization decisions affect ancestral states.

TELEPORT MASSIVE × WAFT
