

CORPORATE TIMELINE

Teleport Massive | Key Events

The Beginning: 2008

September 10, 2008 | 10:28 AM

The Large Hadron Collider achieves first beam circulation at CERN. According to Teleport Massive research, this may be the moment reality as we know it began.

The Founding: 2025

July 1, 2025

Teleport Massive Incorporated

Dr. Elena Voss and Dr. Marcus Chen officially found Teleport Massive with \$2M in seed funding. Sarah Kim joins as CFO.

Mission: "To study quantum entanglement and scale quantum teleportation from mini to macro."

August 2025

- Laboratory facilities secured
- Initial equipment purchased
- Research protocols established

October 2025

- First successful micro-scale teleportation (single particle)
- Chen Stabilization Protocol validated at quantum scale

December 2025

- Year-end funding round (\$10M Series A)
- Expansion of research team approved

The Breakthrough: 2026

January 2026

January 2: First major hiring push — 3 Lead Scientists recruited:

- Aziah Calderon
- Dr. Priya Sharma
- Dr. James Park

January 13, 2026 | 14:47:23 UTC

THE QUANTUM INCIDENT (TM-TX-8472)

Sarah Chen experiences multi-state existence during routine teleportation test. For 0.003 seconds, she exists in multiple quantum states simultaneously.

Discovery: Scints are not errors — they are windows into reality’s structure.

January 14, 2026

- Emergency board meeting
- Human trials suspended
- Scint Research Division proposed

February 2026

- Scint Research Division established
- Sarah Chen reassigned as Lead Researcher
- Aziah Calderon promoted to Head of R&D

March 2026

- Research Finding 8472 published (internal): Quantum Entanglement and Temporal Loops
- Discovery of the Eternal Return mechanism

April 2026

- Research Finding 9283: Earth Life as Temporal Anomaly
- Classification system established: EXISTENTIAL SIGNIFICANCE

Ongoing Research

Current Projects

- Scint detection and classification
- Stabilization protocol development
- Temporal mechanics research
- WAFT integration for AI-assisted research

Future Milestones (Projected)

- **2027:** Safe macro-scale teleportation (non-biological)
- **2028:** Human trials resume (enhanced safety protocols)
- **2030:** Commercial teleportation network (target)

TELEPORT MASSIVE | “Making Distance Irrelevant Since 2025”
