

THE CHRONICLER

WAFB | Automated Documentation Generation

What is the Chronicler?

The **Chronicler** is WAFB's automated documentation system. It generates reports, briefs, and records from simulation data.

Key Capability

The Chronicler transforms raw WAFB data into professional documents — PDFs, reports, memos, and more.

Document Types

Reports

- Status reports
- Financial reports
- Research summaries
- Incident reports

Briefs

- Executive briefs
- Personnel briefs
- Mission briefs
- Technical briefs

Records

- Employee records
- Transaction logs
- Event histories
- Meeting minutes

Creative

- Memos (in-character)
- Letters
- Announcements
- Fictional documents

Using the Chronicler

```
from waft.chronicler import Chronicler

chronicler = Chronicler(project_path=Path("."))

# Generate a corporation report
report = chronicler.generate_report(
    report_type="status",
    corporation_id="teleport_massive_20250701",
    period="Q1 2026",
)

# Save as PDF
report.save_pdf("reports/tm_q1_2026.pdf")
```

Report Templates

Status Report

```
report = chronicler.generate_report(  
    report_type="status",  
    corporation_id=corp_id,  
    include_sections=[  
        "executive_summary",  
        "financial_overview",  
        "personnel_changes",  
        "research_progress",  
        "next_quarter_goals",  
    ],  
)
```

Personnel Brief

```
brief = chronicler.generate_brief(  
    brief_type="personnel",  
    being_id=being.being_id,  
    include_sections=[  
        "background",  
        "skills_assessment",  
        "performance_history",  
        "recommendations",  
    ],  
)
```

Customization

Custom Templates

```
chronicler.register_template(  
    name="incident_report",  
    template_path="templates/incident.typ",  
    required_fields=["incident_id", "date", "description"],  
)
```

Styling

```
chronicler.set_style(  
    header="TELEPORT MASSIVE",  
    footer="Classification: Internal",  
    color_scheme="corporate_blue",  
    font="New Computer Modern",  
)
```

CLI Commands

```
# Generate status report  
waft chronicle report --corp teleport_massive --type status  
  
# Generate Being brief  
waft chronicle brief --being abc-123 --type personnel  
  
# List available templates  
waft chronicle templates
```

```
# Custom document  
waft chronicle custom --template incident_report --data incident.json
```

Output Formats

- PDF (via Typst)
- HTML
- Markdown
- JSON (raw data)
