

JOHNNY DECIMAL

WAFt | Project Organization System

What is Johnny Decimal?

Johnny Decimal is a system for organizing files and folders using a two-level numeric scheme: Areas (10-99) and Categories (X.00-X.99).

The Pattern

```
XX-XX_area_name/  
  XX_category_name/  
    XX.XX_document_name.md
```

WAFt Organization

Work Efforts

```
_work_efforts/  
├── 00-09_meta/  
│   ├── 00_index/  
│   │   └── 00.00_index.md  
│   └── 01_templates/  
│       └── 01.01_work_effort_template.md  
├── 10-19_development/  
│   ├── 10_features/  
│   │   ├── 10.00_index.md  
│   │   └── 10.01_scint_detection.md  
│   └── 11_bugfixes/  
├── 20-29_documentation/  
└── 30-39_research/
```

Document IDs

Every document has a unique ID:

ID	Meaning
10.01	Area 10, Category 10, Document 01
25.03	Area 20-29, Category 25, Document 03
00.00	Index file (special)

Benefits

Findability

- Know immediately where things are:
- “That’s a 20-something — documentation”
 - “10.x — development work”

Scalability

- 10 areas (00-09 to 90-99)
- 10 categories per area
- 100 items per category
- **10,000 possible items**

Consistency

- Everyone uses the same system:
- No “my stuff” folders
 - No duplicate hierarchies
 - Clear ownership

Navigation

- Index files link everything:
- Area indexes
 - Category indexes
 - Cross-references

Using Johnny Decimal in WAFT

Create Work Effort

```
waft work-effort create "Implement Scint detection" \  
    --area 10 \  
    --category 10  
# Creates: 10_features/10.01_implement_scint_detection.md
```

List by Area

```
waft work-effort list --area 10-19
```

Search

```
waft work-effort search "scint"
```

Index Files

Every category has an index (XX.00_index.md):

```
# 10_features Index
```

Documents

- [[10.01_scint_detection]] - Scint detection feature
- [[10.02_stabilization_loop]] - Stabilization implementation

Best Practices

1. **Always use the system** — Don’t create ad-hoc folders
2. **Update indexes** — Keep them current
3. **Use descriptive names** — Numbers + words
4. **Cross-reference** — Link related documents
5. **Archive, don’t delete** — Move to 90-99 archive area
