

THE PRAYER PROHIBITION

Scientific Rationale | Safety Division

Overview

Effective February 15, 2026, all forms of prayer, invocation, or metaphysical petition are **strictly forbidden** within Teleport Massive facilities.

Important Note

This policy is not a commentary on religion or spirituality. It is a **safety protocol** based on scientific observations.

The Scientific Basis

Our research has revealed an unexpected relationship between focused intentional thought and quantum systems.

Observation 1: Intention Affects Quantum States

In controlled experiments, we observed that focused intention — particularly the kind associated with prayer — measurably affects quantum coherence.

Condition	Quantum Coherence Deviation
No prayer present	Baseline
Unfocused thought	+2% fluctuation
Meditation	+8% fluctuation
Active prayer	+47% fluctuation

Observation 2: Prayer Triggers Scints

During the week of February 1-7, 2026, we recorded 23 Scint events. Analysis revealed:

- 19 of 23 (83%) occurred during times when employees were known to be praying
- Scint severity correlated with prayer intensity
- Group prayer caused cascading Scints

The Mechanism

Prayer is attention. Attention is observation. Observation causes collapse.

In a facility full of delicate quantum systems, uncontrolled observation is dangerous.

Our quantum teleportation equipment relies on maintaining superposition states. When these states are observed prematurely — even by focused intention — they collapse unpredictably.

The Danger

In our facilities, uncontrolled quantum collapse can:

1. Disrupt ongoing experiments
2. Trigger Scint cascades
3. Cause equipment damage
4. Potentially affect human subjects
5. Create [REDACTED] conditions

The Policy

Prohibited

- Prayer of any kind
- Religious invocation
- Meditation with intent
- Group spiritual practice
- Petitionary thought

Permitted

- Secular mindfulness
- Relaxation techniques
- Off-site worship
- Private belief (unexpressed)
- Quiet reflection

Accommodations

We respect all religious traditions. Employees requiring spiritual practice may:

- Use designated off-site areas (500m+ from facility)
- Take religious leave as needed
- Consult with HR for accommodations

Conclusion

This policy exists because **physics requires it**. The laws of quantum mechanics do not distinguish between religious and secular observation. In an environment where observation affects reality, we must control what gets observed.

TELEPORT MASSIVE SAFETY DIVISION

“Your beliefs are respected. Your prayers affect our work.”
