

Scaffolder Package Demo

Overview

The `scaffolder` package shows borders around the main text area, header, and footer in Typst documents. This is invaluable for understanding and debugging layout issues.

Similar to the LaTeX `showframe` package, it provides visual guides for your document structure.

Use Cases

1. **Debugging Margins:** See exactly where your content boundaries are
2. **Layout Design:** Understand how headers/footers relate to main content
3. **Teaching:** Demonstrate page structure to students
4. **Quality Assurance:** Verify consistent margins across pages

Basic Usage

```
#import "@preview/scaffolder:0.2.1": scaffolding
```

```
#set page(background: scaffolding())
```

That's it! The scaffolding function adds visual borders to your page layout.

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequi doleamus animo, cum corpore dolemus, fieri.

Page 2 - Custom Styling

You can customize the border appearance by passing stroke parameters.

Stroke Options

```
// Red thin border
scaffolding(stroke: red + 0.5pt)

// Blue thick border
scaffolding(stroke: blue + 1pt)

// Dashed green border
scaffolding(stroke: (paint: green, dash: "dashed"))
```

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequale doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere.

**Page 3 - Multi-Column
Layout**

Scaffolder works with multi-column layouts too, showing the boundaries of each column.

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequaleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguique possit, augeri amplificarique non possit. At etiam Athenis, ut e patre audiebam facete et urbane Stoicos irridente, statua est in quo a nobis philosophia defensa et.

Column 2

This is the second column. Notice how the scaffolding shows the column boundaries clearly.

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequaleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguique possit, augeri amplificarique non possit. At.

Summary

The `scaffolder` package provides:

- **Visual debugging** for page layouts
- **Customizable strokes** (color, width, dash pattern)
- **Multi-column support**
- **Minimal overhead** - just one function call
