s6t5-page-bordering Demo

Overview

This document demonstrates the `s6t5-page-bordering` package for Typst. This package provides a professional way to add borders around page margins, including support for custom headers and footers.

Key Features

The package offers:

- **Page Border:** A clean border around the entire page content area
- **Header Support:** Custom header content within the bordered area
- **Footer Support:** Custom footer content within the bordered area
- **Configurable Margins:** Full control over page margins
- **Expandable Borders:** Adjust border expansion beyond content

Configuration Parameters

Parameter	Description
margin	Dictionary with left, right, top, bottom values
expand	Border expansion beyond margin
space-top	Space between header and content
space-bottom	Space between content and footer
stroke-header	Stroke style for header border
stroke-footer	Stroke style for footer border
header	Custom header content
footer	Custom footer content

Use Cases

This package is particularly useful for:

1. **Business Documents:** Official reports and specifications
2. **Technical Documentation:** Product manuals and guides
3. **Academic Papers:** Thesis documents and research papers
4. **Legal Documents:** Contracts and agreements

Example Code

```
#import "@preview/s6t5-page-bordering:1.0.0": s6t5-page-bordering
#show: s6t5-page-bordering.with(
  margin: (left: 30pt, right: 30pt, top: 60pt, bottom: 60pt),
  expand: 15pt,
  header: your-header-content,
  footer: your-footer-content,
)
```

Classification: Internal	WAFT Documentation System	Version 1.0.0
