Total Ideas: 28

Key Ideas

QUESTION

What is WAFT?

Stream Theta, the Incomplete

CONCEPT

****WAFT is a Python framework for directed evolution of self-modifying AI agents.****

Asura Tritiya, the Complete

CONCEPT

****Key Concept**:** Code is DNA. Agents can spawn variants, hot-swap their own code, and evolve over generations.

Chandra Panchama, the Vocal

ACTION

Agents face four types of errors they must handle:

Shakti Harita, the Stable

ACTION

Agents must stabilize errors to survive. The Scint Gym tests agents and measures their fitness.

Matrix Old, the Vocal

ACTION

Think of it as a scientific instrument for studying the physics of artificial cognition. Instead of just building agents, WAFT lets you ****breed them**** - creating agents that evolve their own code through natural selection.

Mortalis Caeruleus, the Clever

Additional Insights

CONCEPT

WAFt is built to produce data for research on **"The Physics of Artificial Cognition."** It's not just a framework - it's a scientific instrument.

Njord Modr, the Simple

ACTION

> "Don't just build agents. Breed them."

Valkyrie Tiondi, the Incomplete

CONCEPT

- Be tested in fitness systems (Scint Gym)

Rune Blar, the Weak

ACTION

- Mutations = code changes, config updates, prompt evolution

Samsara Krishna, the Fierce

CONCEPT

Pillar 2: The Physics (Scint System)

Aura Hex, the Ordered

CONCEPT

- **Parent ID**: Lineage tracking (who spawned this agent)

Prudens Tertius, the Impatient

QUESTION

How It Works

Jiva Rakta, the Vocal

ACTION

Creates a new evolutionary laboratory with:

| *Tyr Visr, the Fierce*

CONCEPT

- _pyrite/ memory system

| *Vishnu Purusha, the Chaotic*
