Package 1: s6t5-page-bordering

URL: <https://typst.app/universe/package/s6t5-page-bordering>

Overview

The `s6t5-page-bordering` package creates professional bordered pages with customizable headers and footers. Ideal for business documents, technical specifications, and formal reports.

Key Features

- Professional page borders around content
- Custom header and footer support
- Configurable margins and spacing
- Consistent styling across pages

Usage Example

```
1  #import "@preview/s6t5-page-bordering:1.0.0": s6t5-page-bordering
2
3  #show: s6t5-page-bordering.with(
4    margin: (left: 30pt, right: 30pt, top: 60pt, bottom: 60pt),
5    expand: 15pt,
6    space-top: 15pt,
7    space-bottom: 15pt,
8    header: your-header,
9    footer: your-footer,
10 )
```

Parameters

Parameter	Description
margin	Dictionary with left, right, top, bottom values
expand	Border expansion beyond margin
space-top	Space between header and content
space-bottom	Space between content and footer
header	Custom header content
footer	Custom footer content

Great for
formal
business
documents!

Package 2: drafting

URL: https://typst.app/universe/package/drafting

Overview

The `drafting` package provides margin notes and inline annotations for document review. Perfect for collaborative editing and feedback.

Basic Margin Notes

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore.

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.

This is a margin note on the right side

Styled Notes

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Blue styled note

Green styled note

Inline Notes

Lorem ipsum dolor sit amet, consectetur adipiscing elit. This is an inline annotation Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Multiple Reviewers

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Lorem ipsum dolor sit amet, consectetur. Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Reviewer A comment

Left margin note

Package 3: scaffolder

URL: <https://typst.app/universe/package/scaffolder>

Overview

The `scaffolder` package shows borders around the main text area, header, and footer for debugging layout issues. Similar to LaTeX's `showframe` package.

Usage

```
1 #import "@preview/scaffolder:0.2.1": scaffolding
2
3 #set page(background: scaffolding())
```

Customization

```
1 // Red thin border
2 scaffolding(stroke: red + 0.5pt)
3
4 // Blue thick border
5 scaffolding(stroke: blue + 1pt)
6
7 // Dashed green border
8 scaffolding(stroke: (paint: green, dash: "dashed"))
```

Use Cases

- 1. **Debugging Margins** - See exact content boundaries
- 2. **Layout Design** - Understand page structure
- 3. **Teaching** - Demonstrate page anatomy
- 4. **Quality Assurance** - Verify consistent margins

Features

Feature	Description
Visual debugging	See exact content boundaries
Custom strokes	Color, width, dash patterns
Multi-column	Works with column layouts
Minimal setup	Single function call

Enable scaffolding temporarily to debug layout issues!

Package 4: codly

URL: <https://typst.app/universe/package/codly>

Overview

Codly supercharges code blocks with line numbering, syntax highlighting, language icons, annotations, and much more.

Setup

```
1 #import "@preview/codly:1.3.0": *
2 #import "@preview/codly-languages:0.1.1": *
3 #show: codly-init.with()
4 #codly(languages: codly-languages)
```

Code Examples

Python

```
1 def fibonacci(n):
2     if n <= 1:
3         return n
4     return fibonacci(n - 1) + fibonacci(n - 2)
5
6 # Calculate first 10 Fibonacci numbers
7 for i in range(10):
8     print(f"F({i}) = {fibonacci(i)}")
```

Rust

```
1 fn main() {
2     let numbers = vec![1, 2, 3, 4, 5];
3     let sum: i32 = numbers.iter().sum();
4     println!("Sum: {}", sum);
5 }
```

JavaScript

```
1 const fetchData = async (url) => {
2     const response = await fetch(url);
3     return response.json();
4 };
```

Features

- Line numbering with customizable format
- Syntax highlighting via language detection
- Language icons with codly-languages
- Zebra striping for readability
- Code highlights and annotations
- Smart indentation for wrapped lines

Codly automatically detects languages and applies syntax highlighting!

Package 5: pinit

URL: <https://typst.app/universe/package/pinit>

Overview

Pinit provides relative positioning by pins - place invisible markers in text and draw arrows, highlights, and annotations between them.

Basic Highlighting

A simple highlighted phrase in text.

Arrows Between Elements

Connect this  that.

Multiple Highlights

Text with , , and  sections.

Key Functions

Function	Description
<code>pin(name)</code>	Place invisible marker
<code>pinit-highlight()</code>	Highlight between pins
<code>pinit-arrow()</code>	Arrow between pins
<code>pinit-double-arrow()</code>	Bidirectional arrow
<code>pinit-point-to()</code>	Arrow pointing to pin
<code>pinit-point-from()</code>	Arrow from pin to content
<code>pinit-rect()</code>	Rectangle around pins
<code>pinit-line()</code>	Line between pins

Perfect for slides
and educational
materials!

Package 6: showybox

URL: <https://typst.app/universe/package/showybox>

Overview

Showybox creates colorful and customizable boxes for callouts, notes, warnings, and highlighted content.

Basic Box

A simple showybox with default styling.

With Title

Note

This showybox has a title section.

Custom Colors

Warning

Red-themed warning box with custom colors.

Information

Blue information box.

Success

Green success notification.

With Shadow

Shadowed

Box with shadow effect for depth.

Features

- Custom colors (title, body, footer, border)
- Shadow effects
- Dashed borders
- Rounded corners
- Boxed/floating titles
- Multi-section support
- Nestable boxes

Great for callouts, warnings, and tips!

Summary

All Packages at a Glance

Package	Version	Purpose
s6t5-page-bordering	1.0.0	Professional page borders with headers/footers
drafting	0.2.2	Margin notes and inline annotations
scaffolder	0.2.1	Layout debugging borders
codly	1.3.0	Beautiful code blocks with syntax highlighting
pinit	0.2.2	Pins, arrows, and relative positioning

Quick Import Reference

```
1 // All packages in one import block
2 #import "@preview/s6t5-page-bordering:1.0.0": s6t5-page-bordering
3 #import "@preview/drafting:0.2.2": *
4 #import "@preview/scaffolder:0.2.1": scaffolding
5 #import "@preview/codly:1.3.0": *
6 #import "@preview/codly-languages:0.1.1": *
7 #import "@preview/pinit:0.2.2": *
8 #import "@preview/showybox:2.0.4": showybox
```
