

FIELD GUIDE FG-EMPIRICA-001

EMPIRICA TUI DASHBOARD USER MANUAL

Monitoring Epistemic State with Terminal Dashboards

USER MANUAL

Issued by: WAFT Framework

Date: January 19, 2026

INTRODUCTION

This manual explains how to use the Empirica TUI dashboards through the WAFT command `waft empirica monitor`. It covers prerequisites, setup, command examples, interactive controls, and troubleshooting.

QUICK SUMMARY

The Empirica dashboards provide terminal-based visibility into epistemic state, CASCADE workflow progress, and snapshot memory quality.

PREREQUISITES

- ☐ Python 3.11+ installed
- ☐ Empirica installed: `pip install empirica`
- ☐ WAFT project initialized: `waft init`
- ☐ Terminal supports ANSI colors (80x24 minimum)

WINDOWS USERS

Install curses support: `pip install windows-curses`

INSTALLATION & SETUP

- 1

Verify Empirica is installed: `empirica --version`
- 2

Initialize Empirica in the project: `waft init`
- 3

Create a session: `waft session create --ai-id claude-code`
- 4

Launch the dashboard: `waft empirica monitor`

BASIC USAGE

`waft empirica monitor`
`waft empirica monitor --type cascade`
`waft empirica monitor --type tui`
`waft empirica monitor --session-id <SESSION_ID>`
`waft empirica monitor --path /path/to/project`

DASHBOARD TYPES

- **Snapshot Monitor:** Memory quality, compression, and reliability
- **CASCADE Monitor:** PREFLIGHT to POSTFLIGHT workflow tracking
- **TUI Dashboard:** Full Textual UI with activity and vectors

Dashboard Comparison

Feature	Snapshot Monitor	CASCADE Monitor	TUI Dashboard
UI Library	curses	curses	Textual
Refresh	Manual (r)	Event-driven	Auto (1-5s)
Best For	Memory quality	Workflow tracking	Full monitoring

INTERACTIVE COMMANDS (SNAPSHOT MONITOR)

- **q** - Quit
- **r** - Refresh
- **f** - Full (toggle snapshot list)
- **e** - Export snapshot JSON

- **d** - Details view (vectors)

TROUBLESHOOTING

 COMMON ERRORS

- **Empirica not installed:** Run `pip install empirica`
- **Empirica not initialized:** Run `waft init`
- **No module named 'textual':** Run `pip install textual`
- **No module named 'curses' (Windows):** Run `pip install windows-curses`
- **Session not found:** Check with `waft session status`

REFERENCE

```
waft empirica monitor --type snapshot|cascade|tui
waft empirica monitor --session-id <SESSION_ID>
waft empirica monitor --path /path/to/project
```

APPENDIX: GLOSSARY

Key Terms

Term	Definition
CASCADE	Empirica workflow: PREFLIGHT, INVESTIGATE, CHECK, ACT, POSTFLIGHT
Epistemic Vectors	Quantitative signals of knowledge and uncertainty
Snapshot	Saved epistemic state with reliability metrics
