

Plans Report - Final Test

Comprehensive Plans Collection

Generated January 14, 2026

This report was typeset using HTML/CSS and WeasyPrint.

Generated on January 14, 2026

Total Plans: 3

Note: This report was generated using WeasyPrint (HTML/CSS) instead of LaTeX.

Reason: LaTeX compiler (pdflatex) not found on this system. Please install a LaTeX distribution (e.g., TeX Live, MiKTeX) to use LaTeX compilation.

The report maintains the same textbook-style formatting and structure as the LaTeX version.

Preface

This report contains 3 plans gathered from the work efforts system. Each plan represents a documented intention, goal, or project outline. Plans are organized chronologically and by category where applicable.

Table of Contents

70's/80's Retro-Modern Visual Overhaul

70's/80's Retro-Modern Visual Overhaul

Achievements System Enhancement Plan

70's/80's Retro-Modern Visual Overhaul

Overview: Transform the FogSift website from cold brutalist aesthetic to warm 70's/80's retro-modern style matching the logo and profile badge, with simplified structure and removed complexity.

Todos: 12 items

Vision

Transform FogSift from cold brutalist tech aesthetic to warm, confident 70's/80's retro-modern style that matches the logo and profile badge.

Phase 1: Foundation (Tokens and Box Model)

1.1 Color Palette Overhaul

File: `src/css/tokens.css`

Replace current palette with brand-derived colors:

```
/ 70's/80's Retro Palette /  
--cream: #f5f0e6;          / Primary background /  
--cream-dark: #e8e0d0;     / Secondary background /  
--chocolate: #4a2c2a;      / Primary text, borders /  
--chocolate-light: #6b4423; / Secondary text /  
--burnt-orange: #e07b3c;   / CTA, accents /  
--rust: #c2410c;           / Hover states /  
--earth-mid: #8b5a2b;      / Decorative /  
--earth-dark: #5c3d2e;     / Decorative /
```

1.2 Typography System

File: `src/css/tokens.css`

- Keep Inter but increase weight usage - Add geometric display font option (Outfit or DM Sans) - Bolder headings, confident letter-spacing

```
--font-display: 'Outfit', 'Inter', sans-serif;
--text-headline: clamp(2.5rem, 6vw, 4rem);
--letter-spacing-tight: -0.02em;
--letter-spacing-wide: 0.1em; / For labels /
```

1.3 Box Model / Border System

File: `src/css/tokens.css`

- Rounded corners (badge aesthetic) - Softer shadows (no hard offset) - Double-line borders (retro feel)

```
--radius: 8px;
--radius-lg: 16px;
--radius-badge: 24px;
--border-width: 3px;
--shadow-soft: 0 4px 20px rgba(74, 44, 42, 0.1);
--shadow-card: 0 8px 30px rgba(74, 44, 42, 0.15);
```

Phase 2: Structure (Wireframe and Sections)

2.1 Simplified Page Structure

File: `src/index.html`

Reduce to 5 clean sections:

NAVIGATION	Minimal, logo left, links right
HERO	Badge-style centered card
"Straight answers to complicated	

questions."	
[Contact CTA]	
THE PROCESS	3 horizontal steps, icon badges
[Deconstruct] [Trace] [Solve]	
ABOUT	Photo + bio in badge card
Christopher - Owner	
PRICING	3 tier cards, horizontal
[Call] [Deep Dive] [Engagement]	
FOOTER	Minimal, links + copyright

2.2 Remove Complexity

Files: `src/index.html`, `src/js/main.js`, `src/css/components.css`

Remove: - Floating CTA button - Progress bar - Breadcrumb system - Diagnostic checklist (move to copy) - Complex timeline with IO boxes - Tech stack tags - Capabilities grid

Keep: - Toast notifications (useful feedback) - Theme toggle (user preference) - Mobile hamburger menu (necessary)

Phase 3: Component Design

3.1 Badge-Style Cards

Primary design pattern: rounded rectangles with cream backgrounds, chocolate borders

```
.card {
  background: var(--cream);
  border: var(--border-width) solid var(--chocolate);
  border-radius: var(--radius-lg);
  padding: 2rem;
}
```

3.2 Section Dividers

Horizontal rules with decorative elements (matching logo underline)

```
.section-divider {  
  height: 4px;  
  background: var(--chocolate);  
  width: 60%;  
  margin: 0 auto;  
  border-radius: 2px;  
}
```

3.3 CTA Button Style

Pill-shaped, bold, matches brand orange

```
.cta-button {  
  background: var(--burnt-orange);  
  color: var(--cream);  
  border-radius: var(--radius-badge);  
  padding: 1rem 2.5rem;  
  font-weight: 700;  
  text-transform: uppercase;  
  letter-spacing: 0.1em;  
}
```

3.4 Navigation

Minimal top bar, logo left, few links right, no breadcrumbs

Phase 4: Content Hydration

4.1 Hero Section

- Large badge-style card - Headline in bold display font - Single CTA button - No subtext clutter

4.2 Process Section

- 3 numbered badges in a row - Simple icon + title + one sentence - No input/output boxes

4.3 About Section

- Christopher badge image (already perfect) - Name, title, one-liner bio - No tech stack, no capabilities grid

4.4 Pricing Section

- 3 clean cards - Clear pricing - No emoji decorations

Phase 5: Polish and Cleanup

5.1 Remove Dead Code

- Delete floating CTA HTML/CSS/JS - Delete progress bar - Delete breadcrumb system - Delete diagnostic checklist - Delete unused CSS classes

5.2 Simplify JS

- Keep: Toast, Theme, Nav (mobile menu) - Remove: Diagnostic counter, floating CTA observer, complex scroll handlers

5.3 Dark Mode Adaptation

Invert to dark chocolate background with cream text, keep orange accent

Key Files to Modify

| File | Changes | |-----|-----| | `src/css/tokens.css` | Complete palette and token overhaul | | `src/css/base.css` | Typography, layout simplification | | `src/css/components.css` | New card/badge components, remove old | | `src/index.html` | Simplified 5-section structure | | `src/js/main.js` | Remove floating CTA, diagnostic, progress |

Success Criteria

1. Site matches logo/badge aesthetic (warm, retro, confident) 2. Fewer than 100 lines of JS 3. Single-page flow with 5 clear sections 4. No floating elements or complex interactions 5. Works perfectly on mobile 6. Fast load time (less CSS/JS)

70's/80's Retro-Modern Visual Overhaul

Overview: Transform the FogSift website from cold brutalist aesthetic to warm 70's/80's retro-modern style matching the logo and profile badge, with simplified structure and removed complexity.

Todos: 12 items

Vision

Transform FogSift from cold brutalist tech aesthetic to warm, confident 70's/80's retro-modern style that matches the logo and profile badge.

Phase 1: Foundation (Tokens and Box Model)

1.1 Color Palette Overhaul

  text-transform: uppercase;  
  letter-spacing: 0.1em;  
}
```

3.4 Navigation

Minimal top bar, logo left, few links right, no breadcrumbs

Phase 4: Content Hydration

4.1 Hero Section

- Large badge-style card - Headline in bold display font - Single CTA button - No subtext clutter

4.2 Process Section

- 3 numbered badges in a row - Simple icon + title + one sentence - No input/output boxes

4.3 About Section

- Christopher badge image (already perfect) - Name, title, one-liner bio - No tech stack, no capabilities grid

4.4 Pricing Section

- 3 clean cards - Clear pricing - No emoji decorations

Phase 5: Polish and Cleanup

5.1 Remove Dead Code

- Delete floating CTA HTML/CSS/JS - Delete progress bar - Delete breadcrumb system - Delete diagnostic checklist - Delete unused CSS classes

5.2 Simplify JS

- Keep: Toast, Theme, Nav (mobile menu) - Remove: Diagnostic counter, floating CTA observer, complex scroll handlers

5.3 Dark Mode Adaptation

Invert to dark chocolate background with cream text, keep orange accent

Key Files to Modify

| File | Changes | |-----|-----| | `src/css/tokens.css` | Complete palette and token overhaul | | `src/css/base.css` | Typography, layout simplification | | `src/css/components.css` | New card/badge components, remove old | | `src/index.html` | Simplified 5-section structure | | `src/js/main.js` | Remove floating CTA, diagnostic, progress |

Success Criteria

1. Site matches logo/badge aesthetic (warm, retro, confident) 2. Fewer than 100 lines of JS 3. Single-page flow with 5 clear sections 4. No floating elements or complex interactions 5. Works perfectly on mobile 6. Fast load time (less CSS/JS)

Achievements System Enhancement Plan

Overview: Enhance the achievements system with a dedicated achievements page, improved floating panel, Fab Lab skill progression, and proper privacy controls with local data management.

Todos: 8 items

Overview

Transform the existing achievements system into a comprehensive gamified learning experience that tracks both site interactions and Fab Lab skill progression, with a dedicated achievements page, improved floating panel, and proper privacy controls.

Phase 1: Data Architecture & Privacy Controls

1.1 Enhanced Achievement Data Model

Expand the current `CFL.achievements` system in `[_layouts/default.html]` (`_layouts/default.html`) (lines 418-545) to include:

- **Skill-based achievements** for Fab Lab learning paths (3D Printing, Laser Cutting, CNC, Electronics) - **Rarity tiers**: Common, Uncommon, Rare, Epic, Legendary - **XP/Points system** for overall progression level - **Streak tracking** for consecutive visits/actions

1.2 Privacy Disclaimer Component

Create a dismissible floating disclaimer that: - Appears on first visit (stored in `localStorage`) - Explains what data is stored locally - Provides "Clear All Data" and "Export Data" buttons - Uses existing alert/callout components from `[_includes/components/alert.html]` (`_includes/components/alert.html`)

```
// Key storage items to document
localStorage.cflAchievements // Unlocked achievements
localStorage.cflStats         // Click counts, pages visited
localStorage.cflPrivacyAccepted // Disclaimer dismissed
```

Phase 2: Floating Panel Improvements

2.1 Stability Fixes

Address issues in current panel (lines 946-1143 of `default.html`): - Add error boundaries for localStorage failures - Fix scroll lock behavior on mobile - Improve close-on-outside-click reliability

2.2 Enhanced Panel UI

- **Overall Level Display:** Show user's total XP and current level with progress bar to next level - **Recent Achievements:** Highlight newly unlocked badges with animation - **Quick Stats:** Use [`stat.html`](_includes/components/stat.html) component for click count, pages visited, achievements unlocked - **Level Progress Bar:** Use [`progress.html`](_includes/components/progress.html) with animated variant

2.3 Improved Achievement Cards

- Add rarity border colors (gold for legendary, purple for epic, etc.) - Show category icons more prominently - Add hover tooltips with detailed unlock requirements - Improve progress bar visibility for in-progress achievements

Phase 3: Dedicated Achievements Page

3.1 Create `/wiki/achievements.md`

A full-page experience with:

Header Section: - User level badge with XP progress - Total achievements unlocked (X/Y) - Fun title based on level ("Apprentice Maker", "Fab Lab Expert", etc.)

Learning Paths Section (Tabs): Using [`tabs.html`](`_includes/components/tabs.html`) with these categories: - All Achievements - Site Explorer (page visits, interactions) - 3D Printing Path - Laser Cutting Path - CNC Path - Secret/Easter Eggs

Achievement Grid: Card-based layout using enhanced achievement cards showing: - Icon, name, description - Progress bar for incomplete - Unlock date for completed - Rarity badge - XP value

Stats Dashboard: Using [`stat.html`](`_includes/components/stat.html`) components: - Total XP earned - Current streak - Rarest achievement unlocked - Time played (pages viewed)

Privacy Controls Footer: - "Export My Data" button (JSON download) - "Clear All Progress" button with confirmation - Privacy explanation text

3.2 Add New Fab Lab Achievements

Expand from 16 to ~30 achievements:

3D Printing Path (5 new): - `3d-curious` - Visit the 3D Printing wiki page - `filament-fan` - Learn about 3 different filament types - `slicer-starter` - Read about slicing software - `print-pro` - Complete all 3D printing wiki pages - `layer-legend` - Master level (complete all + quiz)

Laser Cutting Path (5 new): - `beam-beginner` - Visit Laser Cutting wiki - `material-master` - Learn about different materials - `focus-finder` - Read about focus calibration - `cut-champion` - Complete all laser wiki pages - `precision-pro` - Master level

CNC Path (4 new): - `mill-curious` - Visit CNC wiki - `feeds-speeds` - Read about feeds and speeds - `toolpath-trainee` - Learn about toolpaths - `cnc-commander` - Complete all CNC pages

Phase 4: Gamification Enhancements

4.1 Level System

```
// XP thresholds for levels
Level 1: 0 XP - "Curious Visitor"
Level 2: 50 XP - "Apprentice Maker"
Level 3: 150 XP - "Fab Lab Regular"
Level 4: 300 XP - "Workshop Warrior"
Level 5: 500 XP - "Master Maker"
Level 6: 750 XP - "Fab Lab Legend"
```

4.2 XP Values by Rarity

- Common: 5 XP - Uncommon: 15 XP - Rare: 30 XP - Epic: 50 XP - Legendary: 100 XP

4.3 Visual Polish

- Level-up celebration animation (confetti particles) - Achievement unlock toast enhancements - Sound effects for different rarities (already have `CFL.sounds`) - Holographic effect for legendary achievements using `.cfl-holo` utilities

Files to Create/Modify

File	Action	Description
<code>_wiki/achievements.md</code>	Create	Dedicated achievements page
<code>_layouts/default.html</code>	Modify	Enhanced achievement system JS
<code>assets/css/main.css</code>	Modify	New achievement styles, rarity colors
<code>_includes/privacy-disclaimer.html</code>	Create	Floating privacy disclaimer component

Implementation Order

1. Privacy disclaimer component (establishes consent pattern) 2. Enhanced data model with new achievements 3. Floating panel improvements 4. Dedicated achievements page 5. Level system and XP calculations 6. Visual polish and animations
