THE CODE REVIEW

FOR OFFICIAL USE ONLY

THE CODE REVIEW

A SCREENPLAY

FADE IN:

INT. OFFICE - DAY

The office is quiet. Too quiet. ALICE sits at her desk, staring at a pull request. The diff is massive. 5000 lines changed.

ALICE

(to herself)

This is going to take forever.

BOB enters, coffee in hand.

BOB

Morning! What's up?

ALICE

(pointing at screen)

This PR. It's... everything.

BOB

(looking at screen)

Oh. Oh no.

ALICE

I've been reviewing for three hours. I'm only on line 47.

BOB

Want me to take a look?

ALICE

Would you? I think I'm going blind.

Bob sits down. He scrolls through the diff. His expression changes from curiosity to horror.

BOB

This function is 500 lines long.

ALICE

I know.

BOB

And it's called "doStuff".

ALICE

I know.

BOB

And there are no tests.

ALICE

I know.

BOB

(standing up)

I need to talk to Charlie.

CUT TO:

INT. CHARLIE'S OFFICE - DAY

Charlie is typing furiously. Bob knocks.

CHARLIE

Come in!

Bob enters. Charlie doesn't look up.

BOB

Charlie, we need to talk about this PR.

CHARLIE

(without looking up)

Which one?

BOB

The one with 5000 lines and a function called "doStuff".

Charlie stops typing. Slowly turns around.

CHARLIE

Oh. That one.

BOB

We can't merge this.

CHARLIE

Why not? It works.

BOB

It works, but... it's not right.

CHARLIE

What's not right about it?

BOB

Everything. The naming. The structure. The lack of tests. The 500-line function.

CHARLIE

But it works.

BOB

That's not enough.

CHARLIE

(sighs)

Fine. What do you want me to do?

BOB

Refactor it. Break it into smaller functions. Add tests. Give things proper names.

CHARLIE

That'll take days.

BOB

Better days than years of technical debt.

Charlie looks at his screen. Looks at Bob. Nods.

CHARLIE

You're right. I'll do it.

BOB

Thank you.

CUT TO:

INT. OFFICE - ONE WEEK LATER

Alice is reviewing a new PR. It's clean. Well-structured. Has tests. She approves it immediately.

ALICE

(to herself)

Now this is how you write code.

FADE OUT.
