HYPOTHESIS

Primary Hypothesis

Ho (Null Hypothesis): The claim is false

H1 (Alternative Hypothesis): All CRITICAL and HIGH security issues from the critique were fixed in the technical requirements document

Testable Predictions

If the claim is true, we expect to find:

1. Evidence supporting the claim exists
 2. Verification checks pass
 3. Assumptions validate the claim
- =====

METHODOLOGY

Verification Process

This proof employs a multi-layered verification approach:

1. **Environment Verification:** Confirms system state, date/time, disk space, working directory
2. **Code Analysis:** Direct examination of source files using regex pattern matching
3. **Assumption Validation:** Systematic testing of each assumption with evidence collection
4. **Evidence Documentation:** All findings include source files, line numbers, and code snippets

Evidence Collection Standards

- **Source Attribution:** Every finding includes file path and line numbers
 - **Reproducibility:** Verification methods are documented and repeatable
 - **Traceability:** Evidence chains link findings to source code
 - **Confidence Scoring:** Each assumption receives a confidence level (0.0-1.0)

These headers will create black bars in PDFs:

- field_guide.py:112 - Black background (#000) on header

Fix: Remove 'background: #000' and change 'color: #fff' to 'color: #000'
Use 'border-bottom: 3px solid #000' instead of black background
