1. Science-Bitch Project Status

Generated: 2026-01-14T10:29:14.368350
Work Effort: WE-260112-az3z

1.1 Project Goals

Create a comprehensive command that runs the full scientific method workflow:

- Hypothesis formation
- Experiment design
- State capture (A and B)
- Data collection (C)
- Analysis and reporting
- PDF generation for documentation

1.2 Current Status

Progress: 0/0 tickets completed (0%)

Completed 

- Created folder structure
- Created class
- Added CLI command
- Created README and documentation structure

In Progress 

- Interactive hypothesis creation
- Experiment runner implementation
- PDF report generation
- Field guide PDF

Planned 

- Tooling for experiment management
- End-to-end testing
- Enhanced error handling
- Additional documentation

1.3 Existing Evidence

Code Structure

- **Command:** - Main manager class
- **CLI:** - Command registration
- **Integration:** Uses for core functionality
- **Storage:** directory for experiments and data

Documentation

- **README:** - Overview and quick start
- **Work Effort:** - Tickets and progress tracking
- **Field Guide:** - Usage guide

Tools

- **Scientific Method Tool:** Complete implementation in
- **PDF Generator:** Available via
- **State Capture:** Implemented in
- **Data Collection:** Implemented in

1.4 Objectives & Actions

Primary Objective

Build a fully functional, well-tooled, documented scientific method command with field guide PDF.

Key Actions

1. **Complete Interactive Workflow** ✅
 2. Form hypothesis interactively
 3. Design experiments
 4. Run experiments with state capture
 5. Analyze results
 6. **PDF Generation** 📄
 7. Field guide PDF
 8. Project status PDF
 9. Experiment report PDFs
 10. **Tooling** 📁
 11. Experiment management utilities
 12. Data analysis helpers
 13. Report generation scripts
 14. **Documentation** ✅
 15. README
 16. Field guide
 17. Work effort tracking
-

1.5 Planned Next Steps

1. **Enhance Interactive Workflow**

- 2. Better variable input
- 3. Experiment function loading
- 4. Progress indicators

5. **Complete PDF Generation**

- 6. Fix PDF generation for field guide
- 7. Create project status PDF
- 8. Add experiment report PDFs

9. **Add Tooling**

- 10. Experiment list/status commands
- 11. Data visualization tools
- 12. Report templates

13. **Testing**

- 14. End-to-end workflow test
- 15. Error handling tests
- 16. Integration tests

17. **Documentation**

- 18. Complete field guide
- 19. Add examples
- 20. Troubleshooting guide

1.6 **Tickets**
