

SUCCULENT JEWELRY GUIDE TEMPLATE-001

Complete Guide Template: All Features

Reference Guide for All Features

by Succulent Jewelry

Complete Guide Template: All Features

Introduction

This comprehensive template demonstrates all available features in the Succulent Jewelry PDF system. Use this as a reference when creating your own guides.

Template Guide

This template shows every feature available: image APIs, formatting options, procedures, tips, warnings, tables, and more. Copy sections you need for your guides.

Image API Integration

Using Pixabay (No API Key Required)

Pixabay provides royalty-free images with no setup required.

Pixabay image - automatically fetched with large size (1280px) for PDF quality

Usage in markdown:

```
![Image] (https://pixabay.com/get/gecbf31133fb27177255571e8984d54382b5351173a69b856365990df600)
```

Process with:

```
python scripts/add_images.py \  
  --content your_guide.md \  
  --provider pixabay \  

```

```
--query "succulent" \  
--size large
```

Using Pexels (Requires API Key)

Pexels provides professional, curated photos with photographer attribution.

Pexels image - Photo by [Photographer Name] on Pexels (attribution added automatically)

Usage in markdown:

```
![Image] (https://picsum.photos/800/600)
```

Process with:

```
python scripts/add_images.py \  
  --content your_guide.md \  
  --provider pexels \  
  --query "jewelry" \  
  --size large
```

Note: Pexels requires attribution. The system automatically adds photographer credits.

Using Picsum (Placeholder Images)

Picsum is perfect for testing and placeholders.

Picsum placeholder - great for testing layouts

Formatting Features

Headers

Use headers to organize your content:

H1 - Main Section

H2 - Subsection

H3 - Sub-subsection

Text Formatting

- **Bold text** for emphasis
- *Italic text* for subtle emphasis
- `Code formatting` for technical terms
- Regular text for body content

Lists

Unordered lists: - First item - Second item - Third item with **bold** text - Nested item - Sub-item one - Sub-item two

Ordered lists: 1. First step 2. Second step 3. Third step

Step-by-Step Procedures

Procedures use numbered circles with proper formatting:

- 1 Prepare your workspace** - Clear a clean, well-lit area with all tools within reach
- 2 Gather materials** - Collect all necessary items before beginning to avoid interruptions
- 3 Review safety guidelines** - Always prioritize safety and follow manufacturer instructions

4

Begin the process - Start with the first step and work methodically through each stage

Step-by-step procedures with numbered circles

Tips and Warnings

Pro Tips

💡 Pro Tip

Tips help readers achieve better results. Use them to share expert knowledge, shortcuts, or best practices that enhance the process.

💡 Image Quality Tip

For PDF guides, use the "large" size option (1280px) from Pixabay or Pexels. This ensures crisp, professional images that look great when printed or viewed digitally.

Warnings

Important Safety Warning

Always follow safety protocols. This is critical information that prevents harm or damage. Use warnings for safety concerns, irreversible actions, or critical mistakes to avoid.

Cautions

Caution

Use cautions for things that require careful attention but aren't as critical as warnings. These help readers avoid common pitfalls or suboptimal results.

Tables

Tables organize information clearly:

Feature	Pixabay	Pexels	Picsum
API Key Required	No	Yes	No
Image Quality	High	Professional	Placeholder
Search Available	Yes	Yes	No
Attribution Required	Optional	Required	No
Best For	Production	Professional	Testing

Image Size	Dimensions	Use Case
Preview	150px	Thumbnails
Webformat	640px	Web display
Large	1280px	PDF guides
Full HD	1920px	High quality

Image Size	Dimensions	Use Case
Original	4000px+	Print quality

Code Examples

Use code blocks for technical instructions:

```
# Generate a guide with images
python scripts/add_images.py \
  --content content/guides/my_guide.md \
  --provider pixabay \
  --query "succulent" \
  --size large

# Then generate PDF
python scripts/generate_guide.py \
  --content content/guides/my_guide.md \
  --title "My Guide" \
  --output generated/guides/
```

```
from scripts.image_api import PixabayAPI, PexelsAPI

# Pixabay example
pixabay = PixabayAPI()
url = pixabay.get_image_url(
    width=800,
    height=600,
    query="succulent",
    size="large"
)

# Pexels example (requires API key)
pexels = PexelsAPI()
url = pexels.get_image_url(
    width=800,
    height=600,
    query="jewelry"
)
```

Image Examples

Different Sizes

Large image (recommended for PDFs):

Large format image - 1280px width, perfect for PDF guides

Medium image:

Medium format image - 800x600, good for web or smaller PDFs

Multiple Images in Sequence

First image in a sequence

Second image showing progression

Third image demonstrating completion

Advanced Features

Combining Elements

You can combine procedures with tips:

- 1** **Select your image provider** - Choose Pixabay for immediate results or Pexels for professional photos
- 2** **Process placeholders** - Run the add_images script to replace placeholders with actual URLs
- 3** **Generate PDF** - Use generate_guide.py to create your final PDF

💡 Workflow Tip

Process images first, then generate the PDF. This ensures all images are properly loaded and formatted.

Troubleshooting Section

Common issues and solutions:

Problem	Cause	Solution
Images not showing	Placeholders not processed	Run add_images.py script
Poor image quality	Wrong size selected	Use "large" size for PDFs
API errors	Missing API key	Add PEXELS_API_KEY to .env file
PDF generation fails	Missing dependencies	Install weasyprint and dependencies

⚠️ API Rate Limits

Pexels has rate limits (200 requests/hour). For batch processing, add delays between requests or use Pixabay for high-volume operations.

Resources Section

Recommended Tools

- **Pixabay API:** <https://pixabay.com/api/docs/>
- **Pexels API:** <https://www.pexels.com/api/>
- **WeasyPrint:** <https://weasyprint.org/> (PDF generation)

Documentation

- Image API Guide: See `IMAGE_API_GUIDE.md`
- Pixabay Guide: See `PIXABAY_API_GUIDE.md`
- System README: See `README.md`

External Resources

- [Pixabay](#) - Free images and videos
- [Pexels](#) - Free stock photos
- [Gumroad](#) - Sell your PDF guides

Best Practices

- 1 Plan your content** - Outline your guide before writing to ensure logical flow
- 2 Use appropriate images** - Select images that enhance understanding, not just decoration
- 3 Add captions** - Always include image captions to provide context
- 4 Test before finalizing** - Generate a test PDF to check formatting and image quality
- 5 Include attribution** - Credit photographers when using Pexels images

💡 Quality Checklist

Before publishing: Check image quality, verify all links work, test PDF generation, ensure proper attribution, and review formatting consistency.

Conclusion

This template demonstrates all available features. Use it as a starting point for your own guides, selecting the elements that best serve your content.

💡 Customization

Feel free to modify this template to match your style. The system is flexible and supports various content structures and formatting needs.

This template is part of the Succulent Jewelry PDF Generation System. For more information, see the README.md file.

Image Credits

Images provided by [Pixabay](#) and [Pexels](#).

All images are used in accordance with their respective licenses. Photographer credits are included where available.
