

Sample Academic Paper: Template Comparison Study

WAFt System, Template Integration Team

WAFt Project

Abstract

This paper demonstrates WAFt's academic paper generation capabilities using WeasyPrint, providing LaTeX-quality output without requiring LaTeX installation.

Introduction This paper demonstrates the capabilities of WAFt's academic paper template system, inspired by the ETH Zurich article template. ## Methodology We compared five LaTeX templates: 1. Twenty Seconds CV Template 2. INSA Toulouse Academic Templates 3. NIH F31 Grant Templates 4. D&D 5e LaTeX Template 5. ETH Zurich Article Template ## Results The templates show diverse approaches to academic document generation, from simple single-file structures to complex modular systems. ## Conclusion WAFt's WeasyPrint-based approach provides flexibility without requiring LaTeX installation.
