

Codly Package Demo

Codly supercharges code blocks for Typst documents with annotations, line numbers, syntax highlighting, language icons, and much more.

Basic Setup

```
1 #import "@preview/codly:1.3.0": *
2 #import "@preview/codly-languages:0.1.1": *
3 #show: codly-init.with()
4 #codly(languages: codly-languages)
```

 Typst

Code Examples

Rust

```
1 pub fn main() {
2     println!("Hello, world!");
3 }
4
5 fn fibonacci(n: u32) -> u32 {
6     match n {
7         0 => 0,
8         1 => 1,
9         _ => fibonacci(n - 1) + fibonacci(n - 2),
10    }
11 }
```

 Rust

Python

```
1 def quicksort(arr):
2     if len(arr) <= 1:
3         return arr
4     pivot = arr[len(arr) // 2]
5     left = [x for x in arr if x < pivot]
6     middle = [x for x in arr if x == pivot]
7     right = [x for x in arr if x > pivot]
8     return quicksort(left) + middle + quicksort(right)
9
10 # Example usage
11 numbers = [3, 6, 8, 10, 1, 2, 1]
12 print(quicksort(numbers))
```

 Python

JavaScript

```
1 const fetchData = async (url) => {
2     try {
3         const response = await fetch(url);
```

 JavaScript

```
4     const data = await response.json();
5     return data;
6   } catch (error) {
7     console.error('Error:', error);
8     throw error;
9   }
10 };
11
12 // Arrow function example
13 const multiply = (a, b) => a * b;
```

Advanced Features

Highlights

```
1 def greet(name):  
2     message = f"Hello, {name}!"  
3     return message
```

 Python

Custom Language Configuration

```
1 // Custom Rust styling  
2 struct Point { x: f64, y: f64 }
```

 Rust

Without Line Numbers

```
npm install  
npm run build  
npm start
```

bash

Without Zebra Striping

```
1 SELECT users.name, orders.total  
2 FROM users  
3 JOIN orders ON users.id = orders.user_id  
4 WHERE orders.total > 100  
5 ORDER BY orders.total DESC;
```

sql

More Languages

TypeScript

```
1  interface User {
2    id: number;
3    name: string;
4    email: string;
5  }
6
7  const getUser = async (id: number): Promise<User> => {
8    const response = await fetch(`/api/users/${id}`);
9    return response.json();
10 };
```

typescript

Go

```
1  package main
2
3  import "fmt"
4
5  func main() {
6    messages := make(chan string)
7
8    go func() {
9      messages <- "Hello, Goroutines!"
10    }()
11
12    msg := <-messages
13    fmt.Println(msg)
14 }
```

go

YAML

```
1  name: CI Pipeline
2  on: [push, pull_request]
3
4  jobs:
5    build:
6      runs-on: ubuntu-latest
7      steps:
8        - uses: actions/checkout@v4
9        - name: Build
10          run: npm run build
```

yaml

Summary

Codly provides:

- **Line numbering** with customizable format
- **Syntax highlighting** via language detection
- **Language icons** with codly-languages companion
- **Zebra striping** for readability
- **Highlights** for specific code sections
- **Annotations** for explanations
- **Smart indentation** for wrapped lines
- **Skip lines** to show partial code
- **References** to lines and highlights

Package: codly v1.3.0

Companion: codly-languages v0.1.1
