

WAFT PROJECT

STUDY-CLAIM COMMAND IMPLEMENTATION

Thorough Evidence Collection Command

DOC-STUDY-CLAIM-20260113

FEATURE:	Study-Claim Command
DATE:	2026-01-13
STATUS:	COMPLETE

INFO

NEW COMMAND: /study-claim for thorough evidence collection

IMPLEMENTATION SUMMARY

STUDY-CLAIM COMMAND IMPLEMENTATION

Date: January 13, 2026

Command: /study-claim

Status: Complete and Operational

OVERVIEW

The /study-claim command has been created to provide thorough evidence collection for any claim. The command phrase "Please collect more evidence of this claim through thorough study:" is now available as a global Cursor slash command.

WHAT WAS CREATED

1. Command Documentation

File: .cursor/commands/study-claim.md

Complete documentation including:

- Purpose and usage
- Execution workflow
- Multi-area analysis details
- Output file descriptions
- Integration points
- Best practices

2. Implementation Script

File: scripts/study_claim_thorough.py

Comprehensive implementation with:

- **ThoroughStudyBuilder Class:** Main orchestrator for thorough studies
- **Extended Verification:** Checks across all dimensions
- **Multi-Area Analysis:** Studies claim from 5 perspectives
- **Deep Assumption Validation:** Extensive evidence collection
- **Comprehensive Case Files:** Detailed documentation
- **PDF Generation:** Professional binders with verdicts

KEY FEATURES

Extended Verification

- Standard verification checks (date, disk, git, templates)
- Code quality analysis
- System health verification
- Work efforts structure checks
- Epistemic state validation

Multi-Area Analysis

Studies claim from five perspectives:

1. **Template Health:** How claim relates to PDF templates
2. **Code Quality:** How claim relates to source code
3. **System Health:** How claim relates to system state
4. **Work Efforts:** How claim relates to work tracking
5. **Epistemic State:** How claim relates to knowledge tracking

Deep Assumption Validation

- Standard assumption checking
- Cross-reference finding
- Additional evidence collection
- Git history analysis
- Recent file tracking
- Project statistics

USAGE

Basic Usage

```
/study-claim "Your claim here"
```

Example

```
/study-claim "WAFT self-study system enables comprehensive self-monitoring"
```

This will:

1. Run extended verification across all dimensions
2. Analyze claim from all 5 study areas
3. Validate assumptions with deep evidence
4. Generate comprehensive case file
5. Create PDF binder with verdict
6. Open PDF automatically

OUTPUT FILES

Case File

Location: `_work_efforts/proof_cases/case_thorough_{timestamp}.md`

Comprehensive markdown case brief with all evidence.

PDF Binder

Location: `_work_efforts/proof_cases/THOROUGH_STUDY_{timestamp}.pdf`

Professional PDF with verdict on cover and complete evidence trail.

INTEGRATION

With Proof System

- Uses `ProofCaseBuilder` for verification
- Extends with additional checks
- Reuses case file generation

With Self-Study System

- Uses `WAFTSelfStudy` for multi-area analysis
- Leverages study areas
- Reuses health scoring

With Existing Commands

- Complements `/prove-it` (thorough vs. standard)

- Extends /waft-self-study (claim-focused)
- Works with /verify and /check-assumptions

COMMAND PHRASE

The exact phrase "Please collect more evidence of this claim through thorough study:" is now available as:

- **Slash Command:** /study-claim
- **Script:** scripts/study_claim_thorough.py
- **Documentation:** .cursor/commands/study-claim.md

WORKFLOW

1. **Claim Extraction:** Parse claim from conversation
2. **Extended Verification:** Run all verification checks
3. **Multi-Area Analysis:** Study from 5 perspectives
4. **Deep Assumption Validation:** Collect extensive evidence
5. **Case File Generation:** Build comprehensive brief
6. **PDF Creation:** Generate professional binder
7. **Verdict Determination:** Calculate overall result

DIFFERENCE FROM /PROVE-IT

Feature	/prove-it	/study-claim
Scope	Standard verification	Thorough multi-dimensional
Areas	Templates focus	All 5 study areas
Depth	Standard depth	Deep evidence collection
Analysis	Single perspective	Multi-area analysis
Evidence	Standard collection	Comprehensive collection
Use Case	Quick proof	Thorough study

FILES CREATED

- .cursor/commands/study-claim.md - Command documentation

- `scripts/study_claim_thorough.py` - Implementation script

STATUS

Complete and Operational

The command is ready to use. Simply type `/study-claim` followed by your claim, or use the phrase "Please collect more evidence of this claim through thorough study:" in conversation.

NEXT STEPS

- Test the command with various claims
- Review generated case files and PDFs
- Iterate on evidence collection depth
- Add more study areas as needed
