---------------------------------------	-------------------------------------	--------------------------------

City Districts

Plans organized by category - the districts of our AI Town:

Other *(456 plans)*

70's/80's Retro-Modern Visual Overhaul

Transform the FogSift website from cold brutalist aesthetic to warm 70's/80's retro-modern style matching the logo and profile badge, with simplified ...

12 todos

70's/80's Retro-Modern Visual Overhaul

Transform the FogSift website from cold brutalist aesthetic to warm 70's/80's retro-modern style matching the logo and profile badge, with simplified ...

12 todos

Adapti

Implement an adaptive architecture that starts simple (file-based only) and automatically scales to complex mode (queue + sidecar index) when needed. ...

Add Wiki Page to CFL Site

Delete the unnecessary Gemfile, create a properly-formatted wiki page matching existing conventions, and push to GitHub Pages for build/deploy.

4 todos

Agent Interface Implementation Plan

Implement the BaseAgent class and example agent based on the completed design document, integrating with Waft's existing systems (Decision Engine, Emp...

12 todos

AI-Scientist Integration Study Plan

Conduct a comprehensive reference study of the AI-Scientist repository to understand its architecture, patterns, and methodologies, then adapt key con...

12 todos

Auth Security Audit & User Registration Plan

Comprehensive security audit of the current Cloudflare KV auth system, followed by a two-phase implementation of user registration: Phase 1 (admin-onl...

9 todos

Auth Flow Screenshot Capture

Run the Playwright screenshot capture script against localhost:4321 to document the complete auth flow, then commit and push all changes including the...

3 todos

... and 448 more plans in this category

System Architecture *(81 plans)*

Achievements System Enhancement Plan

Enhance the achievements system with a dedicated achievements page, improved floating panel, Fab Lab skill progression, and proper privacy controls wi...

8 todos

Attention, Chakra, and Vibrational Resonance System Implementation

Implement a comprehensive attention, chakra, and vibrational resonance system for WAFT beings, integrating with existing D&D rules, karma, and lifecyc...

10 todos

Attention & Focus System Implementation Plan

Implement a comprehensive attention/focus mechanism for WAFT beings, including Arrow of Attention, vibrational resonance, shocker system, energy types...

Challenge System for Beings - _pyrite Integration & Economic Loop

16 todos

Core Queue System

Implement the foundational Job Queue system (`core/QueueSystem.js`) with sequential processing and error handling, plus a test script (`test-queue.js`) ...

4 todos

D&D Campaign Command System

Create a new Cursor command `/dnd-campaign` that evolves a Being with a custom name, runs an automated D&D 5e campaign with AI as DM, generates progre...

9 todos

Mission Control Site Navigation

Add a consistent navigation bar across the Mission Control dashboard and docs page, using the amber/orange theme from the dashboard, with mobile-respo...

5 todos

Mission Control Site Navigation (Revised)

Add a consistent navigation bar across the Mission Control dashboard and docs page, integrating carefully with the existing layout and using a shared ...

5 todos

... and 73 more plans in this category

User Interface *(63 plans)*

Clone build

Clone the build-your-own-x repository from GitHub into the Code workspace base directory

3 todos

Quick Deploy Script and Cloudflare Deployment

Create a quick deploy script with pre-deployment checks, then push current changes and deploy to Cloudflare Pages.

4 todos

Enhanced Quick Deploy Script

Create a comprehensive deploy script with pre-flight checks, file tree visualization, bundle size reporting, and deployment manifest generation before...

4 todos

Evolve New Streamlit UI for WAFT

Spawn a Being from Source and execute complete evolution workflow to build a comprehensive Streamlit UI dashboard for WAFT that integrates all major s...

14 todos

Fogsift v2.0.0 Implementation

Replace the current Hello World site with the full Fogsift v2.0.0 build from the manifest, then deploy to Cloudflare Pages.

5 todos

Full UX/UI Review Plan

Comprehensive UX/UI audit and improvement plan for How To Win Capitalism, covering consistency, mobile experience, visual polish, and accessibility wi...

11 todos

Home Page UI Upgrade

Intellectual Obstacle Course Benchmark Suite

Create a comprehensive benchmark suite with progressively complex tasks ranging from trivial file operations to complex multi-system orchestration, st...

11 todos

... and 55 more plans in this category

Document Generation *(45 plans)*

Advanced PDF Creator Safe Installation and Testing Plan

Install and test the advanced-pdf-creator Streamlit application (<https://github.com/CodeByPinar/advanced-pdf-creator.git>) in a safe, isolated environm...

18 todos

Cheatsheet PDF Generation Pilot

Generate professional PDFs from selected GitHub cheatsheet repositories using WAFT's PDF generation tools. Start with 2-3 repositories as a pilot to e...

6 todos

Plan: Comprehensive Feature Showcase PDF

Create a script that generates a PDF demonstrating all WAFT PDF generation features including adaptive constraint enforcement, PNG conversion, metrics...

4 todos

Plan: Comprehensive WAFT Feature Showcase PDF

Create a single multi-page PDF booklet that demonstrates every feature developed in WAFT, including all template types, Foundation V1/V2 blocks, Docum...

8 todos

Plan: Convert Larval Form Specification to Scientific PDF Research Document

Transform the LARVAL_FORM_COMPLETE_SPECIFICATION.md into a beautiful scientific PDF research document using WAFT's ScientificPDFGenerator with proper ...

Convert Markdown to PDF

Convert the DEEP_CODE_ANALYSIS markdown document to PDF using WAFT's modern PDFGenerator system

D&D Campaign Plan: PDF Maker Evolution Work Effort

Create a D&D campaign plan that serves as a testbed for evolving the PDF maker. Generate multiple campaign documents (player guide, DM guide, encounte...

Evolve PDF Comparison Script to ArXiv-Ready Generator

Transform the comparison script from generating 3 comparison PDFs to generating a single ArXiv-ready academic paper PDF using the existing academic pa...

... and 37 more plans in this category

Testing & Quality *(45 plans)*

Awesome Python Integration Testing Plan

Create a feature branch to systematically test WAFT system integration with all projects from awesome-python repository, ordered by increasing complex...

10 todos

Comp

Create client-side data flow tests (client-flow.test.js) to complete the data flow test suite, document client state management logic, and finish work...

Work Effort: Documentation, Testing, and Quality Improvements

Address the 6 pending tickets in WE-260105-9a6i: fix the waft info duplicate bug, update documentation (README and CHANGELOG), create test infrastru...

6 todos

Empiric

Test and evaluate Empirica's epistemic framework concepts on the _pyrite repository by applying the CASCADE workflow, measuring epistemic vectors, and...

Enhance Engineering Command with Scientific Method and Hypothesis Testing

Transform the engineering command to heavily emphasize hypothesis testing using the scientific method and make Empirica usage central to the workflow....

12 todos

Foundation Stress Test & Calibration Plan

Create comprehensive unit tests for TheFoundation/DocumentEngine and a calibration artifact script that generates a stress-test PDF to verify visual i...

4 todos

Frontend Testing Setup Plan

Set up Vitest testing framework for TypeScript/JavaScript code in frontend/ and visualizer/ directories, including test configuration, example tests, ...

8 todos

Pull Latest Changes from Origin

Pull the 4 commits from origin/main to sync your local branch with the remote repository.

1 todos

... and 37 more plans in this category

MCP Servers *(36 plans)*

Add webdev-mcp MCP Server Globally

Add the webdev-mcp server to your global Cursor MCP configuration to enable screenshot and screen listing tools across all projects.

1 todos

Browser Tools MCP Implementation Plan

Add the BrowserTools MCP server to your Cursor IDE, enabling AI-powered browser monitoring with console logs, network traffic capture, screenshots, DO...

3 todos

Decimal-Docs-Maintainer MCP Server

Explore MCP Cortex Architecture

Interactive exploration of your 11-server MCP Cortex architecture, organized into 4 cognitive modules: Working Memory, Planning, Tool Layer, and Creat...

4 todos

Fix GitHub MCP Server

Update the GitHub MCP server configuration to use the correct Streamable HTTP format with PAT authentication, replacing the non-functional OAuth-only ...

3 todos

Fix MCP Work-Efforts Folder Name

Update the MCP work-efforts server to use `\_work\_efforts` instead of `\_work\_efforts\_` as the default folder name, making it consistent with fogsift an...

2 todos

GitHub MCP Server Setup (Remote OAuth)

Add the Remote GitHub MCP Server (OAuth) to your existing Cursor MCP configuration, enabling AI tools to interact directly with GitHub repositories, i...

3 todos

MCP Cortex Architecture Evolution Plan

Optimize and evolve your MCP server configuration toward a complete AI cortex architecture by removing redundant servers, adding critical planning cap...

6 todos

... and 28 more plans in this category

APIs & Integration *(24 plans)*

Fogsift API Architecture + Work Effort System

Restructure the work efforts system with scalable IDs (WE-YYMMDD-xxxx), then use it to build the site API architecture with comprehensive documentatio...

11 todos

Fogsift API Architecture + Work Effort System v2

Implement new Work Effort system with scalable IDs (WE-YYMMDD-xxxx), then use it to build the site API architecture with comprehensive documentation a...

10 todos

Clean Code Audit - How To Win Capitalism

Comprehensive audit of the howtowincapitalism codebase against Codacy's 9 clean code principles, identifying violations across hard-coded values, DRY,...

8 todos

Fix baseurl, Create API Reference, and Comprehensive Scan

Change baseurl for GitHub Pages, create API Reference page, add navigation link, and scan for remaining issues.

7 todos

Iteration 2: API, Git Integration & Validation System Design

Comprehensive analysis and design specification for REST API, Git integration layer, and validation system for the Pyrite work efforts system, with pr...

5 todos

Pyrite MCP Servers API Documentation

Create comprehensive API documentation for all Pyrite MCP servers, with both a styled HTML page for humans and a plain-text "AI Assistant Docs" export...

3 todos

OpenAPI Directory Integration Service

Build a comprehensive API service that integrates the APIs-guru/openapi-directory into WAFT, providing search, fetch, validate, transform, generate, a...

12 todos

Simple Pyrite API Documentation

Create simple, expandable API documentation for all Pyrite servers (MCP + Dashboard) with no authentication, featuring both human-readable HTML and on...

3 todos

... and 16 more plans in this category

Bug Fixes *(24 plans)*

Fix Button Padding - Root Cause Found

Fix buttons having zero padding due to size class rendering as "3" instead of "md"

2 todos

CI Fixes and PR Completion Plan

Complete remaining CI fixes for NovaSystem-Codex PR #36 and Towne-Sales-Assistant, then commit local changes in Code repo.

5 todos

Code Quality Audit Fixes

Fix 64+ TypeScript errors and CSS linting issues by adding Cloudflare Workers types, fixing component barrel exports, and resolving type casting issue...

7 todos

Fix CI Lock File Sync

Sync package-lock.json with package.json to fix the GitHub Actions CI failure, and create a work effort to document the fix.

4 todos

Fix Codacy Security Scan Failure

Fix Directory Browser Clicks and Add Search

Fix Footer Links and Home Page Pattern

Fix broken footer navigation links and standardize the home page auth script pattern. Quick win with high impact.

2 todos

GitGuardian False Positive Fix

Address GitGuardian alert by adding exclusion config for test fixtures and fixing documentation discrepancy in .cursorrules. The alerts are verified f...

4 todos

... and 16 more plans in this category

Workflows *(12 plans)*

AI-Town Comprehensive Analysis Workflow Plan (Final - AI Town Version)

Comprehensive analysis workflow to understand ai-town repository, the Generative Agents paper, explore integration opportunities with WAFT, and make e...

6 todos

PR Integrat

Establish a complete workflow for safely incorporating PRs from Claude Code into the local repository, including handling uncommitted changes, reviewi...

Run-It Command - Comprehensive Workflow Orchestration

Create a new `/run-it` slash command that orchestrates a comprehensive workflow sequence: consider → think → check-assumptions → deep-analyze → critiq...

10 todos

Visual Editor Workflow Integration Plan

Plan for integrating Cursor's new visual editor into the How To Win Capitalism development workflow, identifying high-value use cases and establishing...

5 todos

AI-Town Comprehensive Analysis Workflow Plan (Final - AI Town Version)

Comprehensive analysis workflow to understand ai-town repository, the Generative Agents paper, explore integration opportunities with WAFT, and make e...

6 todos

PR Integrat

Establish a complete workflow for safely incorporating PRs from Claude Code into the local repository, including handling uncommitted changes, reviewi...

Run-It Command - Comprehensive Workflow Orchestration

Create a new `/run-it` slash command that orchestrates a comprehensive workflow sequence: consider → think → check-assumptions → deep-analyze → critiq...

10 todos

Visual Editor Workflow Integration Plan

Plan for integrating Cursor's new visual editor into the How To Win Capitalism development workflow, identifying high-value use cases and establishing...

5 todos

... and 4 more plans in this category

Features *(12 plans)*

Auth Features Implementation Plan

Complete the user registration flow by configuring Resend email service, then implement forgot password functionality with token-based password reset.

11 todos

Blog/News Feature for Chico Fab Lab

Critical Security Features Implementation

Implement three critical security features identified from MECANIK comparison: CSRF protection for all forms, PBKDF2 password hashing with per-user sa...

11 todos

Document Library Feature

Add a downloadable document library page to FogSift where users can browse and download PDF forms, templates, and worksheets organized by category.

5 todos

Critical Security Features Implementation

Implement three critical security features identified from MECANIK comparison: CSRF protection for all forms, PBKDF2 password hashing with per-user sa...

11 todos

Auth Features Implementation Plan

Complete the user registration flow by configuring Resend email service, then implement forgot password functionality with token-based password reset.

11 todos

Blog/News Feature for Chico Fab Lab

Document Library Feature

Add a downloadable document library page to FogSift where users can browse and download PDF forms, templates, and worksheets organized by category.

5 todos

... and 4 more plans in this category

Documentation *(12 plans)*

Documentation & Cleanup Deep Dive

Comprehensive documentation overhaul for Pyrite Mission Control: update README with screenshots, add inline code comments to all major files, create a...

10 todos

Implementation Plan: DocumentEngine - Research Documentation Library

Create DocumentEngine class as a reusable Research Documentation Library that generates SCP/Dossier-style PDFs with modular content blocks, configurab...

10 todos

TinaCMS Documentation & Verification Setup

Add TinaCMS documentation to README.md and DEVELOPERS.md, add a smoke test to verify the CMS SPA loads, run npm install to sync the lockfile, and upda...

6 todos

V0.0.1 Auth Flow Documentation Plan

Document the current auth system state (v0.0.1) by capturing screenshots of the complete user flow and updating documentation to reflect the current i...

8 todos

V0.0.1 Auth Flow Documentation Plan

Document the current auth system state (v0.0.1) by capturing screenshots of the complete user flow and updating documentation to reflect the current i...

8 todos

Documentation & Cleanup Deep Dive

Comprehensive documentation overhaul for Pyrite Mission Control: update README with screenshots, add inline code comments to all major files, create a...

TinaCMS Documentation & Verification Setup

Add TinaCMS documentation to README.md and DEVELOPERS.md, add a smoke test to verify the CMS SPA loads, run npm install to sync the lockfile, and upda...

6 todos

... and 4 more plans in this category

Evolution System *(9 plans)*

Implementation Plan: Evolutionary Core - BaseAgent Foundation

Implement the foundational Python structures for the Evolutionary Code Laboratory: create agent module structure, implement Pydantic state models (Age...

4 todos

Local-RAG Self-Evolution Integration Plan

Integrate local-rag into WAFT so agents can ingest their own codebase/documentation, query their knowledge to understand how to improve, experiment wi...

8 todos

Resurrect ProtoCel - Self-Contained Evolving Cell

Create a `/resurrect` ProtoCel - a self-contained cell that lives in its own folder, has its own API, can peer outside itself to observe/interact with...

Implementation Plan: Evolutionary Core - BaseAgent Foundation

Implement the foundational Python structures for the Evolutionary Code Laboratory: create agent module structure, implement Pydantic state models (Age...

4 todos

Local-RAG Self-Evolution Integration Plan

Integrate local-rag into WAFT so agents can ingest their own codebase/documentation, query their knowledge to understand how to improve, experiment wi...

8 todos

Resurrect ProtoCel - Self-Contained Evolving Cell

Create a `/resurrect` ProtoCel - a self-contained cell that lives in its own folder, has its own API, can peer outside itself to observe/interact with...

Implementation Plan: Evolutionary Core - BaseAgent Foundation

Implement the foundational Python structures for the Evolutionary Code Laboratory: create agent module structure, implement Pydantic state models (Age...

4 todos

Local-RAG Self-Evolution Integration Plan

Integrate local-rag into WAFT so agents can ingest their own codebase/documentation, query their knowledge to understand how to improve, experiment wi...
