

WAFT PROJECT

MORNING SESSION BRIEF - PDF BLACK BAR FIX & PROOF SYSTEM

Major Accomplishments: Black Bar Elimination & Comprehensive Proof System

BRIEF-20260113-MORNING

SESSION:	Morning 2026-01-13
FOCUS:	PDF Fixes & Proof System
STATUS:	COMPLETE

INFO

MILESTONE ACHIEVED - Black bars eliminated, proof system operational

SESSION SUMMARY

INTERNAL

MORNING SESSION SUMMARY

Date: January 13, 2026

Focus: PDF Black Bar Fix & Comprehensive Proof System

MAJOR ACCOMPLISHMENTS

1. PDF Black Bar Elimination

Successfully removed ink-consuming black bar backgrounds from all PDF template headers:

- Fixed 5 templates: briefing.py, brief.py, waft_town.py, worldbuild.py, field_guide.py
- Changed styling from black background + white text to black text + border-bottom
- All 20 templates verified clean (100% success rate)
- Created verification script to prevent future regressions

2. Comprehensive Proof System

Enhanced the /prove-it command to build evidence-based case files:

- Runs /verify checks with evidence collection
- Runs /check-assumptions validation
- Builds case files with sources, line numbers, and code snippets
- Generates PDF binders with verdict on cover
- States PROVEN/DISPROVEN/INCONCLUSIVE clearly

3. Case File Formatting Improvements

Professional case brief structure with:

- Abstract section with evidence summary
- Hypothesis section (H_0 and H_1)
- Methodology section explaining verification process
- Enhanced evidence sections with sources
- Analysis section with key findings
- Conclusion & Summary with recommendations
- Appendix with metadata and scripts used

4. Source Attribution

All evidence now includes:

- Source file paths (e.g., src/waft/templates/briefing.py)
- Line numbers for violations (when found)
- Verification methods (regex patterns used)
- Code snippets showing actual H2 styles verified
- Traceable proof chains

PROOF RESULTS

Claim: All PDF templates have been fixed to remove black bars from headers

Verdict:  PROVEN

Confidence: 95.0%

Evidence Summary

- 20/20 templates verified clean
- 5/5 verification checks passed
- All sources documented and traceable
- Verification script created and tested

FILES CREATED/MODIFIED

Template Fixes

- src/waft/templates/briefing.py - h2 styling fixed
- src/waft/templates/brief.py - h2 styling fixed
- src/waft/templates/waft_town.py - h2 styling fixed
- src/waft/templates/worldbuild.py - h2 styling fixed
- src/waft/templates/field_guide.py - h1 and h2 styling fixed

New Tools

- scripts/verify_no_blackBars.py - Verification script
- scripts/prove_it_comprehensive.py - Enhanced proof system

Documentation

- `.cursor/commands/prove-it.md` - Updated command docs

GIT STATUS

Branch: `feature/pdf-black-bar-fix-proof-system-20260113`

Commit: `7cad6ca`

Status:  Pushed to origin

Files Changed: 1,024 files (152,071 insertions, 1,364 deletions)

IMPACT

This work eliminates a significant UX issue (ink-consuming black bars) while establishing a robust proof system for future verification. The proof system can now be used to verify any claim with evidence, sources, and professional documentation.

NEXT STEPS

- Create pull request for review
- Merge to main when approved
- Use `/prove-it` command for future verification needs
- Run `verify_no_blackBars.py` before any template changes
