STATUS:	OPERATIONAL

INFO

NEW BEING: The Archivist keeps things tidy

IMPLEMENTATION SUMMARY

THE ARCHIVIST - IMPLEMENTATION SUMMARY

Date: January 13, 2026

Being: The Archivist

Status: Operational

OVERVIEW

The Archivist is a new Being who handles PDF archive management. Minimal effort, maximum results - like an old guy keeping things tidy in case we need them again someday.

WHAT WAS CREATED

1. The Archivist Script

File: scripts/the_archivist.py

Complete archive management system with:

- **TheArchivist Class:** Main archive management
- **PDF Collection:** Finds all PDFs from a date
- **Archive Organization:** Copies to organized daily folders
- **Morning Reports:** Generates organized PDF reports
- **Archive Index:** Maintains JSON index for retrieval

2. Command Documentation

File: .cursor/commands/the-archivist.md

Complete command documentation with usage examples.

3. Archive Structure

```
_archive/  
├─ daily/  
│   └─ 2026-01-13/  
│       └─ [97 PDFs archived]  
├─ reports/  
│   └─ morning_report_20260113.pdf  
└─ archive_index.json
```

KEY FEATURES

Daily PDF Collection

- Finds all PDFs modified on a given date
- Organizes by category (briefs, proofs, studies, work efforts, other)
- Preserves original files (copies to archive)

Archive Organization

- Daily folders: `_archive/daily/YYYY-MM-DD/`
- Preserves file names and paths
- Tracks file sizes
- Updates archive index

Morning Reports

- Generates organized PDF reports
- Lists documents by category
- Shows file sizes and paths
- Provides summary statistics
- Saves to `_archive/reports/morning_report_YYYYMMDD.pdf`

Archive Index

- JSON index at `_archive/archive_index.json`
- Tracks all archived dates
- Records file counts and paths
- Enables easy retrieval

FIRST ARCHIVE RUN

Date: 2026-01-13

PDFs Archived: 97 documents

Archive Location: `_archive/daily/2026-01-13/`

Report Generated: `_archive/reports/morning_report_20260113.pdf`

USAGE

Daily Archive

```
/the-archivist
```

Archives today's PDFs and generates morning report.

Archive Only

```
/the-archivist --archive-only
```

Just archives, doesn't generate report.

Report Only

```
/the-archivist --report-only
```

Just generates report from existing PDFs.

Archive Statistics

```
/the-archivist --stats
```

Shows archive statistics.

PHILOSOPHY

Minimal Effort, Maximum Results

The Archivist:

- Doesn't move files (just copies to archive)
- Doesn't delete anything
- Keeps things organized
- Makes retrieval easy
- Works quietly in the background

Like an old guy keeping things tidy in case we need them again someday.

INTEGRATION

With Daily Workflow

- Run at end of day to archive
- Review morning report next day
- Find archived documents easily

With Project Organization

- Prevents PDF bloat in main directories
- Maintains organized archive
- Keeps project clean

With Being System

- The Archivist is a Being
- Can be spawned like other Beings
- Learns and evolves archive strategies

ARCHIVE CATEGORIES

PDFs are organized by category in reports:

- **Briefs & Session Reports:** Daily briefs and session summaries
- **Proof Cases & Verification:** Proof documents and verification reports
- **Studies & Research:** Study documents and research PDFs
- **Work Efforts Documents:** Documents from work efforts
- **Other Documents:** Miscellaneous PDFs

STATUS

 Operational

The Archivist is ready to use. Run `/the-archivist` daily to keep things organized.

NEXT STEPS

- Run daily at end of work

- Review morning reports regularly
- Use archive index for retrieval
- Trust The Archivist to keep things tidy
