

# WAFT: The Evolutionary Code Laboratory

**Summary:** Conversation with 28 key ideas, primarily focused on concepts. Contains: 14 concept, 8 action, 5 question, 1 insight.

**Genome:** *Signal Zero, the Simple* (d3025f0b...)  
**Generated:** 2026-01-11 21:57 UTC | **Ideas:** 28 | **Showing:** 8

## Key Ideas

### QUESTION

## What is WAFT?  
*Stream Theta, the Incomplete*

### CONCEPT

\*\*WAFT is a Python framework for directed evolution of self-modifying AI agents.\*\*  
*Asura Tritiya, the Complete*

### CONCEPT

\*\*Key Concept\*\*:  
Code is DNA. Agents can spawn variants, hot-swap their own code, and evolve over generations.  
*Chandra Panchama, the Vocal*

### ACTION

Agents face four types of errors they must handle:  
*Shakti Harita, the Stable*

## Additional Insights

### ACTION

Agents must stabilize errors to survive. The Scint Gym tests agents and measures their fitness.

*Matrix Old, the Vocal*

### ACTION

Think of it as a scientific instrument for studying the physics of artificial cognition. Instead of just building agents, WAFT lets you **\*\*breed them\*\*** - creating agents that evolve their own code through natural selection.

*Mortalis Caeruleus, the Clever*

### CONCEPT

WAFT is built to produce data for research on **\*\*"The Physics of Artificial Cognition."\*\*** It's not just a framework - it's a scientific instrument.

*Njord Modr, the Simple*

### ACTION

> "Don't just build agents. Breed them."

*Valkyrie Tiondi, the Incomplete*

## Breakdown

- **Decisions:** 0
- **Insights:** 1
- **Actions:** 8
- **Concepts:** 14
- **Questions:** 5
