CHAT SESSION: BANNED WORDS & EVOLUTIONARY FEATURES

THE STORY

Discovered we were only using ~30% of WAFT's evolutionary features. **Created** banned words system to enforce word restrictions. **Result:** Complete evolutionary feature inventory and word management system.

KEY ACCOMPLISHMENTS

Banned Words System - Word restriction enforcement

- Created `BannedWordsSystem` class for checking/replacing banned words
- Removed "manifesto" from entire codebase (replaced with "report")
- Renamed `ManifestoGenerator` → `SessionReportGenerator`
- Created global command: `waft-one-pager-chat`

Evolutionary Features Inventory - Complete feature mapping

- Identified ALL available evolutionary features
- Currently using: ~30% (SPAWN, genome IDs, lineage, fitness, names)
- Missing: MUTATE, GYM_EVAL, DEATH, SURVIVAL, Conjugate, selection mechanisms, mutation types, mutation rate control, analysis metrics
- Created: `ONEPAGERCOMPLETEEVOLUTIONARYFEATURES.md`

TOOLS CREATED

BannedWordsSystem (`src/waft/core/banned_words.py`)

- Check, scan, and replace banned words
- Command-line tool: `scripts/removebannedwords.py`
- API for programmatic word management

SessionReportGenerator (renamed from ManifestoGenerator)

- Scientific report generation
- Phylogenetic tree building
- Biodiversity analysis

GLOBAL COMMAND

waft-one-pager-chat

Creates one-pager from current chat session. Works from anywhere in the system.

FILES CREATED

- `src/waft/core/banned_words.py` - *Banned words system*
- `scripts/removebannedwords.py` - *Removal tool*
- `workefforts/BANNEDWORDSSYSTEM.md` - *Documentation*
- `workefforts/ONEPAGERCOMPLETEEVOLUTIONARYFEATURES.md` - *Feature inventory*

PHILOSOPHY

> "Physical constellation of crystallized knowledge inside spacetime through the refraction of light"

Output: `workefforts/onepagers/[title][date].pdf`

Format: 2 pages, printer-friendly, binder-ready

NOTES
