

VIRTUAL REALITY MANUAL

VR SYSTEM SETUP

Welcome to the future of reality. Follow these steps to initialize your neural interface and enter the simulation.

STEP 1: NEURAL LINK

Connect the neural interface to your cerebral port. Ensure secure connection before proceeding.

STEP 2: CALIBRATION

Run calibration sequence. This may take 2-3 minutes. Do not disconnect during this process.

STEP 3: ENTER SIMULATION

Activate VR mode. You will experience a brief disorientation as your consciousness transfers to the virtual environment.

WARNING

CRITICAL: Extended VR sessions may cause reality distortion. Limit sessions to 4 hours maximum.
