

CRYPTO CURRENCY GUIDE

BLOCKCHAIN BASICS

Cryptocurrency operates on decentralized blockchain technology. Each transaction is verified and recorded across a distributed network.

KEY TERMS

- **Blockchain:** Distributed ledger
- **Mining:** Transaction verification
- **Wallet:** Digital storage
- **Smart Contract:** Automated agreements

TRANSACTION EXAMPLE

```
transaction = {  
  "from": "0xABC123...",  
  "to": "0xDEF456...",  
  "amount": 1.5,  
  "currency": "ETH"  
}  
blockchain.verify(transaction)  
blockchain.add(transaction)
```
