

# NEURAL NETWORK ARCHITECTURE

## DEEP LEARNING MODEL

This neural network uses a convolutional architecture with residual connections for image recognition tasks.

### LAYER STRUCTURE

```
Input Layer: 224x224x3
Conv1: 64 filters, 7x7
Pool1: MaxPool 2x2
Conv2: 128 filters, 3x3
ResBlock: 256 filters
ResBlock: 512 filters
FC: 1000 classes
Output: Softmax
```

## PERFORMANCE

Accuracy: 94.7% | Training Time: 12 hours | Parameters: 25M
