METHODOLOGY

Verification Process

This proof employs a multi-layered verification approach:

- 1. **Environment Verification:** Confirms system state, date/time, disk space, working directory
- 2. **Code Analysis:** Direct examination of source files using regex pattern matching
- 3. **Assumption Validation:** Systematic testing of each assumption with evidence collection
- 4. **Evidence Documentation:** All findings include source files, line numbers, and code snippets

Evidence Collection Standards

- **Source Attribution:** Every finding includes file path and line numbers
- **Reproducibility:** Verification methods are documented and repeatable
- **Traceability:** Evidence chains link findings to source code
- **Confidence Scoring:** Each assumption receives a confidence level (0.0-1.0)
