Version 0.1

— Abstract —

Notes for implementing /dnd-scenario, the scenario realm, and experimental iterations.

1 Goals

- Stand up a minimal scenario engine and realm structure
- Add /dnd-scenario Cursor command + CLI wiring
- Persist party state, scenario history, and lore
- Add crystallize/restore hooks for iteration

2 Findings

- (TBD)

3 Decisions

- Keep scaffolding minimal and inline; build on existing WAFT DnD systems

4 TODO

- Map existing DnD campaign/encounter integration points
- Implement ScenarioRealm + ScenarioOrchestrator skeleton
- Wire CLI options for scenario modes + state controls
- Bootstrap _realms/dnd_scenario_realm/ structure
