Version 0.1

Abstract

This notebook tracks the command audit, /bananote setup, and Typst PDF outputs.

1 Goals

- Create /bananote command for Typst notes
- Maintain notes while auditing commands
- Produce Typst PDF with command inventory and recommendations

2 Work Log

2.1 21:14 PST

- Logged plan in devlog for WE-260119-ejtx / TKT-ejtx-008
- Created /bananote command doc in .cursor/commands
- Prepared command inventory extraction

2.2 21:18 PST

- Compiled bananote notes to PDF (font warnings for New Computer Modern Sans)
- Generated commands inventory JSON (129 commands)
- Created commands audit Typst source + Flow Way PDF

2.3 21:28 PST

- Ran /bananote update: logged this request and recompiled notes PDF

3 Findings

- Empirica project-info command not available; used project-list + project-bootstrap with explicit ID
- 129 command docs detected in .cursor/commands
- Several command docs missing standard sections (Purpose, Execution Steps, Output Format)

4 Decisions

- Use Flow Way template for the commands audit PDF
- Use bananote for live notes and archive source + PDF in work effort

5 Next Steps

- Generate commands audit Typst source + PDF
- Update ticket with file links
- Run Empirica postflight
