Major Milestone: Typst Infrastructure Complete

We're excited to announce the completion of our comprehensive Typst template infrastructure! This system provides secure, efficient document generation with support for 10+ templates.

New Features

- Auto-discovery of templates
- Security hardening
- Unified API
- Comprehensive documentation

Upcoming Events

- Template showcase webinar: February 1st
- Community template contest: February 15th
- Documentation sprint: March 1st

Team Spotlight

Our development team has been working tirelessly to bring you this infrastructure. Special thanks to everyone who contributed!

Technical Deep Dive

The infrastructure uses a three-layer architecture:

1. TypstCompiler for secure compilation
2. TypstTemplateRegistry for auto-discovery
3. Template wrappers for unified API

This design ensures security, performance, and developer experience.

Community Contributions

We've received amazing contributions from the community! Thank you to everyone who has tested, reported issues, and suggested improvements.

Looking Ahead

We're planning several exciting features:

- Additional template integrations
- Enhanced data pipeline support
- D&D 5e template expansion
- Performance optimizations

Stay tuned for more updates!
