

HACKER 'S MANIFESTO

THE REBELLION

We are the digital rebels. The code breakers. The system crackers. We exist in the spaces between ones and zeros, in the shadows of the network.

OUR CODE

1. Information wants to be free
2. Access to knowledge is a right
3. Question authority, always
4. Privacy is not negotiable

THE FUTURE

In the neon-lit streets of tomorrow, we are the ghosts in the machine, the voices in the static, the ones who see through the code.
