

Science-Bitch Project Status

WAFT Research Team

1. Science-Bitch Project Status

Generated: 2026-01-12T18:13:17.149545
Work Effort: WE-260112-az3z

1.1 Project Goals

Create a comprehensive `/science-bitch` command that runs the full scientific method workflow:

- Hypothesis formation
- Experiment design

- State capture (A and B)
- Data collection (C)
- Analysis and reporting
- PDF generation for documentation

1.2 Current Status

Progress: 0/0 tickets completed (0%)

Completed 

- Created `_science/` folder structure
- Created `ScienceBitchManager` class
- Added `science-bitch` CLI command
- Created README and documentation structure

In Progress 

- Interactive hypothesis creation

- Experiment runner implementation
- PDF report generation
- Field guide PDF

Planned 

- Tooling for experiment management
- End-to-end testing
- Enhanced error handling
- Additional documentation

1.3 Existing Evidence

Code Structure

- **Command:** `src/waft/core/science_bitch.py` - Main manager class
- **CLI:** `src/waft/main.py` - Command registration
- **Integration:** Uses `scientific_method_tool/` for core functionality
- **Storage:** `_science/` directory for experiments and data

Documentation

- **README:** `_science/README.md` - Overview and quick start
- **Work Effort:** `WE-260112-az3z` - Tickets and progress tracking

- **Field Guide:** `_science/reports/field_guide.md` - Usage guide

Tools

- **Scientific Method Tool:** Complete implementation in `scientific_method_tool/`
- **PDF Generator:** Available via `waft.evolution.pdf_generator`
- **State Capture:** Implemented in `scientific_method_tool/state_capture.py`
- **Data Collection:** Implemented in `scientific_method_tool/data_collection.py`

1.4 Objectives & Actions

Primary Objective

Build a fully functional, well-tooled, documented scientific method command with field guide PDF.

Key Actions

- 1. Complete Interactive Workflow 
- 2. Form hypothesis interactively
- 3. Design experiments
- 4. Run experiments with state capture
- 5. Analyze results
- 6. PDF Generation 
- 7. Field guide PDF

1.5 Planned Next Steps

- 1. Enhance Interactive Workflow
- 2. Better variable input
- 3. Experiment function loading
- 4. Progress indicators
- 5. Complete PDF Generation
- 6. Fix PDF generation for field guide
- 7. Create project status PDF
- 8. Add experiment report PDFs
- 9. Add Tooling
- 10. Experiment list/status commands

1.6 Tickets

- 8. Project status PDF
 - 9. Experiment report PDFs
 - 10. Tooling 
 - 11. Experiment management utilities
 - 12. Data analysis helpers
 - 13. Report generation scripts
 - 14. Documentation 
 - 15. README
 - 16. Field guide
 - 17. Work effort tracking
-

- 11. Data visualization tools
 - 12. Report templates
 - 13. Testing
 - 14. End-to-end workflow test
 - 15. Error handling tests
 - 16. Integration tests
 - 17. Documentation
 - 18. Complete field guide
 - 19. Add examples
 - 20. Troubleshooting guide
-
