KEY JUDGMENTS (TS//SCI//FISHBOWL)

(TS//SCI//FISHBOWL) **We assess with HIGH CONFIDENCE** the primary research vector will reach operational capability within the reporting window.

(TS//SCI//FISHBOWL) **We assess with MODERATE CONFIDENCE** operationalization will be observable to outside parties at or near the moment of first success.

(TS//SCI//FISHBOWL) **We assess with LOW CONFIDENCE** the response will fall within previously observed tolerance – flagged for senior attention precisely because our confidence is low.
