

# 1. WAFT Typst Template Infrastructure Showcase

## Comprehensive Template System

January 19, 2026

### 1.1. Overview

The WAFT Typst infrastructure provides access to **10+ templates** across multiple categories, all accessible through a unified API with comprehensive security features.

### 1.2. Available Templates

#### 1.2.1. Academic Papers

**Arkheion** - arXiv-style academic paper template

- Category: Preprint
- Features: Multiple authors, abstract, keywords, bibliography, appendices

**Charged IEEE** - IEEE conference paper template

- Category: Paper
- Features: Two-column layout, tight spacing, numeric citations

**Unequivocal AMS** - American Mathematical Society paper template

- Category: Paper
- Features: Single-column, theorem/proof functions, bibliography

#### 1.2.2. Books & Reports

**Flow Way** - Modern document/report template

- Category: Report
- Features: Clean design, customizable colors, table of contents

**Wonderous Book** - Fiction book template

- Category: Book
- Features: Title page, TOC, chapter template, dedication

#### 1.2.3. Business Documents

**Appreciated Letter** - Business/personal letter template

- Category: Letter
- Features: Sender/recipient addresses, date, subject

**Dashing Dept News** - Departmental newsletter template

- Category: Newsletter
- Features: Hero image, main column, sidebar articles

#### 1.2.4. Interactive Content

**Badformer** - Retro platformer game **Cereal Words** - Word puzzle game **Icicle** - Christmas puzzle game

### 1.3. Statistics

- Total Templates: 11
- Categories: 8
- Tags: 30

### 1.4. Template Categories

- **book**

- **cv**
- **game**
- **letter**
- **newsletter**
- **paper**
- **preprint**
- **report**

## 1.5. Usage Example

```
from src.waft.templates.typst import get_typst_registry

registry = get_typst_registry()
template = registry.get_template("Flow Way")
generate = registry.get_generate_function("Flow Way")

pdf = generate(
    title="My Document",
    content="# Content",
    output_path=Path("output.pdf")
)
```

## 1.6. Security Features

- Path validation prevents directory traversal
- Content size limits prevent resource exhaustion
- Timeout protection prevents hanging processes
- Subprocess security with shell=False

## 1.7. Performance

Typst compilation is fast:

- Small documents: < 0.5 seconds
- Medium documents: < 1 second
- Large documents: 1-3 seconds

## 2. Conclusion

The Typst infrastructure provides a modern, secure, and efficient system for document generation with comprehensive template support.
