== Question 2: What Should You Do?

You have AS-KH. The board is AC-AD-AH-KS-QS.

You have four aces - the second-best possible hand! The only hand that beats you is a Royal Flush (10S-JS-QS-KS-AS).

Villain goes all-in. What should you do?

Answer: You should call! You have an extremely strong hand. The only way you lose is if villain has the one specific hand

that beats you. This is an easy call.
