WAFT Technical Memo

WAFT PDF Generation System - Complete Documentation

Generated: 2026-01-11 21:44:04

System Overview

WAFT provides comprehensive PDF generation capabilities through multiple generators, each optimized for different use cases. This document demonstrates the actual output from each generator in the system.

Key Features

- Multiple generator classes with different capabilities
- Preset styling configurations
- Component-based adaptive layouts
- Scientific research tools
- Template system for specialized documents
- Foundation system for block-based generation

Technical Architecture

The WAFT PDF generation system uses:

- WeasyPrint for HTML/CSS to PDF conversion

System Overview

WAFT provides comprehensive PDF generation capabilities through multiple generators, each optimized for different use cases. This document demonstrates the actual output from each generator in the system.

Key Features

- Multiple generator classes with different capabilities
- Preset styling configurations
- Component-based adaptive layouts
- Scientific research tools
- Template system for specialized documents
- Foundation system for block-based generation

Technical Architecture

The WAFT PDF generation system uses:

- WeasyPrint for HTML/CSS to PDF conversion

- FPDF2 for pure Python PDF generation
- Adaptive algorithms for constraint satisfaction
- Evolutionary styling genomes
- Component-based document structures

Use Cases

1. **Research Documents**: Scientific papers, lab notebooks, research reports
2. **Technical Documentation**: Field guides, manuals, technical memos
3. **Professional Reports**: Clinical standards, status reports, summaries
4. **One-Pagers**: Quick summaries, overviews, handouts
5. **Evolutionary Documents**: Self-improving content with learning

Conclusion

This document was generated using the Template System generator, demonstrating the actual output quality and formatting capabilities of the WAFT system.
